

## 2000 watt solar system for rv

That's when battery capacity comes into play. You need enough to get all of your stuff thru the 16 hours that solar doesn't produce, and then enough solar to replace what you used and cover your daytime loads in the 6 to 8 good solar hours. I had 700 watts of solar, 800 AH of battery, in Florida, in winter, but no shading because we were on a boat.

It seems that you probably don't need the power in, especially for my system ( 300 ah battle born, 300 watt solar, shore power and 2000 multiplus). But if I did use the power in could I hook the batteries up to the terminals on the side (batteries wired in parallel) and then have my other power in items shore power and solar come from below ...

Here is a list of the most common RV solar mistakes made by RVers when installing or upgrading the solar system in their RV. Features.
