Power steering on my '11 RAV4 has a semi-dead feel in many driving situations but it does provide assist when parking, for example. Past vehicles which weighed much more and didn't have power steering had much better feel on the road and so did a friend's British MG which I drove and which was much lighter.

The Rav4 uses ATF Dexron II/III fluid in the power steering system, not "power steering fluid"; ATF = automatic transmission fluid, but in this case, its power steering fluid, too. Considering that this only costs about \$10-15 in supplies and takes under an hour, its a great DIY; such service costs about \$120 at a shop.

One of the most common Toyota Rav4 electric power steering problems is when the system fails to provide enough power assist to the steering.
