There are two 50A fuses in the front fuse box (engine bay) for the power steering (fuses #3 and #19). There's also a 10A fuse for the power steering module (fuse #39). The Electro-Hydraulic Power Steering (EHPS) assembly contains a control module, electric motor, hydraulic pump and fluid reservoir, integrated into a single unit.

2015 dodge charger power steering assist off service system

Now I still have power steering but the message came back up and the service shifter message came with it. It seems that the service shifter message comes up only when the power steering service comes on. The steering message is constant when I'm driving but the service shifter pops up and dings randomly (and very often).

Oct. 2021 drove car from california to montana. No problem! Nov. 2021 Car started and power steering light came on. I had no power steering and was unable to drive car. Had car towed to dealership and said my steering rack had internal failure and i had to replace rack. Cost me \$3975, 2015 Dodge Charger, 34409 miles - Billings, MT, USA

Power steering pump pressures above specifications but not within 345 kPa (50 psi) of each other, replace pump. Pressures within 345 kPa (50 psi) of each other but below specifications, replace pump. Do not force the pump to operate against the stops for more than 2 to 4 seconds at a time because, pump damage will result.

Although configurations might vary, the basic electric steering system consists of the power steering control module, assist motor, torque sensor and steering position sensor. As mentioned above, the torque and steering position sensors might also provide inputs to other systems, including the vehicle stability control system.
