Power steering systems are designed to make it much easier for drivers to turn the wheels of their vehicle. The system typically consists of a pump, power steering fluid, and a rack and pinion system to turn the wheels. The power steering pump is responsible for transmitting the fluid through the steering system, which causes the gear to move.

2012 Honda Civic EX 98,000 miles Auto trans Electronic Power Steering so no pump or fluid Lost power steering and had this pop up on screen today. It happened once before and the battery was bad. After replacing the battery it went away. On a hunch I had AutoZone check the alternator today, sure enough it was bad.
