Portable solar power banks are useful for people who enjoy spending lots of time outside, away from traditional power sources. Larger solar banks can be used to store clean energy for use when the sun isn't shining. Both options can be good in emergency situations when the electricity goes out.

"Weather, where you live, time of year, and the size and type of solar panels your device uses can all have a significant impact on charging speeds," says Paul Schwent, tech expert and the creator of the Rando Tech Info channel. "Most four-panel 25,000 mAh power banks charge from 0 to 100% in around a week with good sun.
