

7 wonders of the solar system

Will there be a day of Wonders in our Solar System?

Maybe there will be one day, when probes and people have traveled to and explored every planet and moon, every asteroid and chunk of icy debris, every nook and cranny around the Sun. But that day is a long way off. So, in the meantime, I've compiled my list of seven places in our solar system that I consider to be worthy of the status of wonders.

Why is the Sun considered a wonder of the Solar System?

Hydrogen (~73%),helium (~25%),and smaller quantities of other gasses make up the sun. For these reasons,the surfaceof the sun is regarded as a Wonder of the Solar System. 3. The Asteroid belt Located roughly between the orbits of the two planets of Jupiter and Mass,is a circumstellar disc of the asteroid belt.

What is the main source of energy in the Solar System?

The sunis the center of the Solar System around which all the celestial bodies in the Solar System revolve. The sun is almost a perfect sphere of hot plasma and is the main source of energy that sustains all life on Earth.

Discover the most memorable events in the history of our solar system. Travel to the surface of these dynamic worlds to witness the moments of high drama that uniquely shaped each one. ...more...

Seven Wonders of the Solar System. In 1999 Astronomy Magazine proposed seven wonders of the solar system. Although there are many wonders in our local neighborhood of the sun, there is no doubt this list is a intriguing collection of astronomical marvels. The Rings of Saturn - Of all the wonders of the solar system, none are quite as amazing as ...
