

72 volt 45 amp lithium battery

A high-ampere lithium battery can run devices longer. For example, if you have two 18-volt lithium batteries for a power drill. One is rated for 1.5 Ah and the other for 3.0 Ah. The 3 Ah battery can provide twice as much current over time. So if the drill uses 1 amp, the 3 Ah battery would last around 3 hours vs. 1.5 hours for the 1.5 Ah battery.
