Are Energizer industrial 9 volt batteries good for smoke detectors?

Outstanding performance and quality combined with a great price make the Energizer Industrial 9 Volt batteries an excellent choice for smoke detectors. 3. ULTRA LIFE, 10 year, Smoke Alarm Battery We earn a commission if you click this link and make a purchase at no additional cost to you.

Can a 9v battery be used for a smoke detector?

A. Lithium 9Vs aren't recommended for smoke detectors unless you follow a strict battery replacement schedule. Those batteries maintain a high voltage until the end of their usable life, so they provide a much shorter "low battery" warning to alert you that it's time to swap in a fresh one.

What battery does a smoke detector use?

When it comes to your home and family's safety, it's critical to have functioning alarms and to know what battery your smoke detectors use. The battery in your smoke alarm should be something that you can rely on. That's why at First Alert, we recommend a 10-Year Sealed Battery Smoke Alarm. Are 9V or AA's the Best Battery for Smoke Detectors?

Do you need a lithium battery for a smoke detector?

Check the batteries--alkaline or lithium--in your smoke detectors regularly. Q. Do you recommend using 9-volt lithium batteries to replace standard batteries in smoke detectors so that the replacement cycle can be extended?--William P. Bivins, Greenville, NC

How many AA batteries do you need for a smoke alarm?

9V has been the battery of choice for smoke alarms for many years. However, nowadays, it is more common to see two or three AA's in smoke detectors. AA batteries have about three times as much energy as a 9V. When using batteries like these, it's important that you check them consistently and replace your smoke alarm batteries every 6 months.
