

Optimized energy harvesting. ABB's offering for residential applications, including string inverters, low-voltage products and energy storage systems come together to enable consumers to maximize energy harvest and optimize self-consumption while ensuring the installed system is fully coordinated, and compliant, with the local grid.

In order to save space and costs ABB offers string boxes to bring the inverter together in one single combiner box with the protective devices and disconnectors of multiple strings intended to be connected to a specific inverter input.

High-profile solar projects within Central Europe are adopting high-voltage string inverter solutions such as ABB's award winning PVS-175 to deploy highly efficient photovoltaic (PV) installations and improve yields.

ABB and the Italian company FIMER S.p.A announced today that they have signed an agreement for FIMER to acquire ABB's solar inverter business. The transaction will enhance the future prospects of the solar inverter business and will enable ABB to focus its business portfolio on other growth markets.

Effective connectivity. ABB's transformerless central inverter series enables system integrators to design the solar power plant using a combination of different power rating inverters, which are connected to the medium voltage grid centrally.

Built-in best-in-class maximum power point tracking logic (MPPT) Widest band of DC operating voltage. Works on both DC solar panels and AC grid power source - pump at low sunlight or night time with AC grid or generator power. Advanced operating modes ...

Discover our switching and protection Applications for an easy 800V AC recombiner configuration matching both single and multi MPPT inverter technologies. The solution is covering both Commercial & Industrial and Utility scale photovoltaic plants with a string inverter architecture.

With a proven track record in solar since the 1990s, global presence and expertise from solar systems to grid connection and integration to smart grids and microgrids, we are your expert partner. Please note ABB has signed an agreement with Firmer to ...

ABB power converters and controllers help customers to generate and use energy efficiently. They are designed for reliable operation even under the most demanding conditions, and for low life cycle costs.
