SACE&#174; Emax 2 Retrofill Circuit Breakers are designed to retrofill the existing low-voltage circuit breaker compartment with a streamlined solution that gives the switchgear a new lease on life.Emax 2 Retro-fills replace the existing legacy breaker with a modern breaker without the need for cubicle bus or racking modifications. This means minimal downtime while making the change.

It's time for intelligent products to enable smart energy management in older systems. Where air circuit breakers type Megamax were installed, a new retrofitting kit allows Emax 2 circuit breakers to take place and be up and running in a matter of minutes.

60947, with CCC approval, and include both circuit breakers and switch disconnectors. In addition, the Emax 2 portfolio offers the -A/E version, certified according to UL1066 up to 730V. -- High-performance air circuit breakers over 690V. ABB SACE Emax 2/E circuit breakers can control many demanding applications

SACE Emax 2. De disjuntor a gerenciador de energia. Os disjuntores abertos SACE Emax 2 para at&#233; 6300 A, foram projetados para maior efici&#234;ncia. Estes s&#227;o os &#250;nicos disjuntores que protegem circuitos el&#233;tricos enquanto reduzem o consumo de energia, em fun&#231;&#227;o das necessidades do usu&#225;rio, levando &#224; uma redu&#231;&#227;o significativa no desperd&#237;cio de energia.

Seccionadores autom&#225;ticos y con interruptor para aplicaciones de hasta 1150 V CA. Los interruptores de esta versi&#243;n se identifican con las letras de la gama est&#225;ndar (tensi&#243;n nominal de servicio hasta 690 V CA) m&#225;s "/E" y se derivan de los interruptores autom&#225;ticos SACE Emax est&#225;ndar correspondientes.

ML low-voltage circuit breaker is the industry's first smart circuit breaker. Its embedded connec-tivity and load management software provides a comprehensive energy management solution. The load profile optimization functions of ML cir - cuit breaker reduce CO2 emissions and fuel costs. The innovative circuit breaker safeguards a ship's

Air circuit breaker series launched in 1996, was available in different versions and is now obsolete. SACE Emax circuit breaker series consisted in five sizes (E1, E2, E3, E4, E6) available in fixed and withdrawable version with rated uninterrupted currents I u from 800 to 6300A and breaking capacities I cu up to 150kA at

440V AC, 100kA at 690V AC and 65kA at 1000V AC.

monitor devices outside the circuit-breaker with the new external input/output modules. Extremely simple installation Installation of the Emax air circuit-breaker is simple thanks to the reduced number of fixing points positioned on the base of the unit. The availability of a wide range of terminals and conversion kits means

The Emax DC circuit-breakers are available in the fixed or withdrawable, three-pole or four-pole versions. All Emax circuit-breakers for direct current have several poles in series involved in breaking the fault, for this reason special connections busbar (known as "U connection kit") are mounted on the circuit-breaker terminals.

state conditions. Solar panels with on-site battery energy storage systems can reduce fuel consumption. Non-essential loads such as heating, ventilation and air conditioning can then be managed to reduce peaks in power absorption. With ABB's know-how embedded in the smart circuit breaker, every energy source is continuously optimized. Management
