A power inverter is a device that converts and amplifies the 12V DC power stored in batteries to 120V AC power (the power from your outlet) which is what your typical sump pump needs. The ones made for sump pump applications usually have a transfer switch and charger for automatic operation of the pump.

TL;DR: When you want a reliable UPS, APC is one of the top brands for the job, and its BR100MS2 is a fantastic UPS for home and office use has ten standard outlets with surge protection (six with battery backup) and USB-A and USB-C charge ports. The 900W capacity can keep your devices running for quite some time.

1. Choose a Power Inverter. Your home appliances use alternating current (AC) electricity to run. Unfortunately, batteries generate direct current (DC). You can't just connect a battery directly to your home circuit board or your appliances. You need to convert the battery power into AC -- commonly known as household electricity.
