

What is power and influence in a globalized world?

Power and Influence in a Globalized World outlines the strategic framework of the international system's capabilities and interactions amongst the global community.

Should the International Political Economy be based on concentration?

Relying solely on the number of preponderant states in the system to measure the distribution of power is likely to mask these important variations. Finally, structural analyses of the international political economy would also benefit from a greater reliance on concentration.

What are the three types of international system?

It describes the nature of the international system at any given period of time. One generally distinguishes three types of systems: unipolarity, bipolarity, and multipolarity for three or more centers of power. The type of system is completely dependent on the distribution of power and influence of states in a region or globally.

Does concentration provide more information than the number of Poles?

Ordeshook, 1990). It is clear that concentration provides more information than the number of poles about the relative power positions of the major powers and, hence, about the coalitions among them that are likely to form.

Why is concentration important in international relations?

Since concentration measures both the number of major enhanced substantially by considering the influence of concentration, as well as polarity. Studies of the distribution of power occupy a prominent position in the field of international relations.

Does distribution of power explain global outcomes?

Analyses of the distribution of power have led to significant advances in the field of international relations. However, these studies have also been criticized for failing to adequately explain patterns of global outcomes. The argument advanced in this paper implies that, in many cases, these failures can be traced to the

Specifically, the United Nations, the World Bank, and the International Monetary Fund were established to govern international security and monetary policy. The United States has championed this global system of multilateral institutions--known as the liberal world order--for the past seventy-five years.

hierarchical international system with an uneven balance of power. Those with the most power are defined as dominant powers and assert enormous influence

Neo-realists like Kenneth N. Waltz regarded the unipolar global system as the least stable of all structures.

An international system is the concentration of global power

Any great concentration of Power threatens other states and could cause a situation where action may be needed to restore a balance in the international system.

Scholars of international relations generally rely on polarity to measure the distribution of power. I argue that another feature of this distribution--concentration--should be considered more carefully in analyses of international relations. Much of the recent literature on the distribution of power draws on analogies between the structure of markets and the ...

Power and Influence in a Globalized World outlines the strategic framework of the international system's capabilities and interactions amongst the global community. The report shows how power and influence are derived from more than just coercive military capabilities, but are exercised through networks of economic, political, and security interactions involving ...

They can be highly desirable when they promote international cooperation or more problematic when the interests of the elites diverge from those of their citizens. David Rothkopf's Superclass skillfully probes these issues and many more and should be read by all those concerned with the international economy and the evolving global system."

For (many) classical realists, power is constitutive of politics--world politics in particular. It is part of a theory of domination. It is, moreover, related to the idea of government, not understood in ...

(2008), pp. 314-332. The competing theory to power-transition theory is balance-of-power theory. Yves-Heng Lim applies this theory to analyze China's security policy in the Far East in "Beyond Balancing? China's Quest for Security and Power in East Asia," in this issue. Global Power Transitions and Implications / 171

Overview Concepts of political power Power as status Hard, soft and smart power See also Further reading In international relations, power is defined in several different ways. Material definitions of state power emphasize economic and military power. Other definitions of power emphasize the ability to structure and constitute the nature of social relations between actors. Power is an attribute of particular actors in their interactions, as well as a social process that constitutes the social identities and capacities of actors.

From that point forward, the international system has consisted primarily of relations among nation-states. Shifting Balances of Power (1600-1800) In the seventeenth and eighteenth centuries, the nation-state emerged as the dominant political unit of the international system.

Scholars and commentators increasingly see China as a global superpower (Anngang 2012; Cao and Paltiel 2015; Fish 2017) and China's rise is widely understood to be ushering in a new global power distribution (Maher 2016; Shifrinson 2018; Tunsjø 2018; Zeng and Breslin 2016; Xuetong 2019). Footnote 1 China has the world's second largest economy, ...

Power concentration in the global food system and the threat of Big Data 29 Apr, 2019 ... Friends of the Earth International's "Who Benefits?" series highlights the main drivers behind the consolidation of the global food system and how peasants, workers, our health and the environment are all affected. ...

According to Joseph Nye, smart power is the best way to deal with global terrorism, combining hard and soft power. However, soft power is the best option in a world full of international institutions.

13. In international relations, the focus on resources and capabilities has prompted different views of material power, in which the role of the state is preponderant and power is exercised intentionally, deliberately during a conflict; see Little (Citation 2007, p. 97); Claude (Citation 1962); Wallerstein (Citation 1984). Other scholars such as Caporaso (Citation 1978), ...

Dependence is the pattern of external reliance of well-integrated nation-states on one another while dependency, which is closer to the dependencia tradition, involves a more complex set ...

measuring the global distribution of power. I will therefore focus on the limitations of measuring the distribution of power solely by counting the number of poles in the international system; and I ...

This article attempts to clarify what we know and do not know about the international system's power structure by first analysing some key concepts in power analysis and then summarizing ...

During a conference held at Bretton Woods, New Hampshire, from July 1-22 in 1944, delegates from 44 nations met to discuss the postwar global order and establish a new international monetary system. This conference was held in an effort to avoid another global economic depression similar to the one that occurred in the interwar period.

To take into account all potentially relevant sources of power, three levels of power sources will be considered--the state, international, and societal levels. One should consider ...

The explanatory domain of realism is the distribution of power. While mainstream realist approaches see anarchy and the constant restoration of a balance of power among the great powers as the ordering principles of the international system (Waltz, 1979), realist power-transition theory relates order to elements of hierarchy (Organski, 1968). More precisely, the ...

Otherwise, "Realism and international system-level theories suggest that power explains everything that matters in international politics, the interests of states and the actions taken in pursuit of these interests range ... basis of the dominant power in the international and global levels. Nonetheless, there is a solid connection between the ...
