Are solar panels a good investment?

Buying solar panels is a long-term investment that should help cut your electricity bills and carbon footprint. But will they pay for themselves and earn you money? Solar panels are often marketed as a way to save money on electricity - and sometimes as a way to make money too.

Are solar panels worth the cost?

Whether solar panels are worth their cost for you depends on various factors, such as where you live, how much energy you use and how many years you will live in your home and use them.

Do solar panels save money?

The more electricity you use, or the higher its price rises, the more money you will save by installing solar panels. The amount of electricity your home uses depends on how many people live there and their habits. The table below shows potential annual savings for different parts of the UK, depending on how much you're at home during the day.

Do solar panels work in the UK?

Modern solar panels are designed to be effective in various conditions, and many systems include technologies that maximise efficiency regardless of weather. Additionally, solar panels tend to operate more efficiently in cooler temperatures, when compared with hotter climates, so the less intense sun exposure of the UK can actually be an advantage.

How much do solar panels cost in the UK?

According to the Energy Saving Trust, the average solar panel system in the UK is 3.5kWp, with an overall average cost of £7,000. That can rise to as much as £9,000 for a 5kWp system if you have a larger home. These figures represent the total cost, including the panels themselves and the installation costs, which can be substantial.

How much does it cost to install solar panels?

According to [greenmatch.co.uk](http://greenmatch.co.uk), the cost is usually £300 to £500 per person, per day. They say that since it usually takes two people a day to install the system, the end fee is normally somewhere in the region of £600 to £1,000. How much could I save using solar panels?

According to research, the average cost for solar panel installation in the UK ranges from £4,000 to £6,000, depending on your needs. In fact, my quotes fell within this range. Can you install solar panels on any roof? There are a few you need to consider before you have solar panels fitted: The size of the roof. Obviously, the bigger the better.
