

# Are solar panels worth the expense

Why are solar panels so expensive?

Available sunlight, space constraints and installation hurdles can make a solar system more expensive. Trimming trees and repairing your roof, if necessary, will add expense to the project. The angle, pitch and direction of your roof will affect the productivity and efficiency of your solar panels.

Are solar panels worth it?

The federal solar tax credit may reduce the net cost to about \$21,000; local incentives can further lower the cost. You can determine whether solar panels are worth it for your home by considering various factors, such as local incentives and policies your electric bill, and how you finance the system.

How much will solar panels cost in the next 25 years?

Without solar panels, the average homeowner will pay more than \$60,000 in electricity bills over the next 25 years, according to EnergySage data. If you install solar panels now at an average cost of \$20,000, you can save more than \$40,000 over the next two and a half decades.

How much does a solar panel cost?

The average cost of solar in the U.S. is \$31,558, based on the latest cumulative data from the Lawrence Berkeley National Laboratory, a Department of Energy Office of Science laboratory. Solar panel costs are calculated by the price per watt. The average price per watt in the U.S. is \$3.67 for an 8.6 kW system (rounded up).

Do solar panels save you money?

The higher your electricity costs, the more a solar panel system will save you in the long run. This can vary significantly based on your location. If you live in a region with middle- to upper-level utility rates, you can pretty much guarantee that a solar panel will save you big bucks over time.

Can a solar system save you money?

Switching to solar can reduce your monthly electric bill. How much you might save depends on how much power you use, the size of your system, if you buy or rent the solar panels, how much sun your roof gets and your local electricity rates. With net metering, for example, the extra electricity your solar panels generate goes back to the power grid.

Solar panels' productivity degrades at a median, 0.5 percent a year, according to the Department of Energy's National Renewable Energy Laboratory. At the end of a typical, 25-year warranty ...
