

Are sunpower solar panels worth it

Is SunPower a good solar company?

One review, here or elsewhere, can't adequately answer that question, but SunPower has quite a few things going for it. SunPower offers some of the best solar panels available, and its equipment is covered by some of the strongest warranties available, including protection for your roof that outlasts some of its competitors.

How much does SunPower cost?

At \$3.61 per watt, SunPower is not for budget shoppers. It's better suited for solar enthusiasts willing to spare no expense on the best of the best. But, keep in mind that Maxeon Solar Technologies no longer exclusively sells to SunPower, meaning you can install Maxeon's panels without the SunPower bill (but still at a premium).

Does SunPower still make solar panels?

After 2020, SunPower no longer manufactured its own solar panels. Instead, the company and its manufacturing arm, Maxeon, had an exclusive agreement for Maxeon's M-Series panels. In March 2024, the M-Series exclusivity agreement ended as SunPower fell behind on payments.

Are SunPower solar panels a good choice?

SunPower offers some of the most efficient solar panels on the market. Paired with a great warranty option, this makes SunPower an ideal choice for consumers looking to shrink their carbon footprint and save on electricity bills. SunPower's equipment is top-notch, which means you'll be paying top dollar.

Is SunPower more expensive than other solar companies?

Although SunPower is more expensive than other solar companies, investing in high-quality, efficient solar panels ensures your system will generate the maximum amount of solar energy for your home.

Is SunPower a good investment?

SunPower may have a higher price tag than many industry competitors, but it also has a higher return on investment (ROI), given its panel efficiency. According to the Center for Sustainable Systems, most commercial solar panels have an efficiency rating between 17% and 20%.
