

Array solar company

Is array technologies a profitable solar tracker company?

Array Technologies, a profitable solar tracker company, is going public the traditional way and not using the SPAC method like other renewable companies such as QuantumScape and ChargePoint. Array Technologies' single axis trackers have been installed in an 8minutenergy project.

Who is array solar?

Founded and headquartered in the United States, Array relies on its diversified global supply chain and customer-centric approach to deliver, commission and support solar energy developments around the world, lighting the way to a brighter, smarter future for clean energy.

Who is array technologies?

Array Technologies is a global leader advancing the future of clean energy. With over 30 years of innovations that have powered the solar industry, Array is uniquely positioned to deliver renewable energy solutions for customers seeking clean energy adoption in markets around the globe.

What services does array offer?

In addition to our industry-leading solar trackers, Array offers our global customers a competitive warranty, project management, design and technician services for your solar tracking system. Ask Array Technologies about our engineering services as you plan your next project. Still have questions?

Is Array Technologies going public?

Array Technologies is going public through a traditional Initial Public Offering (IPO).

Will array technologies buy STI Norland?

U.S. headquartered Array Technologies will acquire Spanish tracking competitor STI Norland for approximately EUR570 million (\$652 million) in cash and stock. The transaction is expected to close in the first quarter of 2022.
