

## Audi solar panel sunroof

Can anyone give any assistance on retrofitting this pls. I have the sunroof but need to know what else is involved. For the purpose of this, the car is a B7 RS4 and the solar sunroof is from a B6 S4. What other parts do i need to source? ...

A8 / S8 (D2 Platform) Discussion - Retrofitting a solar sunroof in a 200 A8L - Hi, Is there a way to retrofit a sunroof in a 2000 A8L at a reasonable cost? I have access to parts from Germany, so that would probably help...

Actually, the solar panel sunroof is a bit of a very cool idea. While the ignition is off, it actually generates power to keep the air-con system running so on a hot day, the interior isn't a sauna at the end of the day, but rather a cool haven to retire to. As mentioned, started out on Audi A8's. It's also available on the Skoda Superb

The solar sunroof offered by Audi is a typical sunroof with solar panels built into the glass. The climate control system fan is powered by the solar panels so that it may continue to circulate clean outside air into the car even when the engine is stopped without consuming any battery power. The result is a temperature in the car that is up to ...

Re: Solar Sunroof Technology (abydielsgli) the solar roof was mainly used for an auxiliary motor that cool the inside of the car on a hot day. for the cars that have the feature. its not like the solar panel that vws come with the maintain the battery, im sure they will be used for other things in the future. but from what i understand thats what its used for.

Audi is partnering up with the maker of an ultra-thin and flexible solar cell to bring the power of solar energy to a new generation of vehicles with a solar-powered sunroof. Audi's integration ...

Audi Solar Panel Sunroof. Never one to shy away from technology (even when it's not quite ready for prime time), Audi once offered a solar panel sunroof. The sunroof wasn't see-through like a glass moonroof, but it was pretty trick looking, and it powered the climate control fan in an effort to keep interior temperatures a little more ...

I just finished retrofitting my solar panel sunroof on my 2004 A4 B6. It's a pretty easy retrofit, but it takes a

## Audi solar panel sunroof

lot of time and having a buddy with you helps a lot. I took the entire sunroof assembly off an Audi S4. You cannot replace just the glass panel, because the sunroof assembly has two contacts, one on each side.

I've enjoyed my solar sunroof here in Austin, although I don't know if I would order it again. (Ask me again in August when it's 115 F here.) I sometimes miss the transparency of the roof, but the more I think about my experience in previous cars, the times I'd open the panel and NOT open the entire roof were few and far between.

Audi &gt; D2 &gt; 1997-2003 Body Exterior 60 - Sunroof Sunroof motor zero position, adjusting Motor is removed Harness connectors connected Move rotary control to &quot;roof closed&quot; position. Sunroof motor runs to zero position and switches off automatically. Install motor in this position with sunroof closed.

The solar panel sunroof is a really cool feature. I haven't been able to find a way to mod it to trickle-charge the battery, but I think it would be awesome if that were possible. ...

Solar energy has long generated electricity both on building roofs and in huge &quot;solar farms&quot; for utility companies, but only a few cars have had solar panels on their bodies. Solar roofs aren't a ...

This Genuine Volkswagen Audi Solar Sunroof Panel (Mfg#4B0877071P) fits Audi C5 A6 2.7T, Audi C5 A6 4.2, Audi C5 A6 V6 3.0L, Audi C5 Allroad Quattro 2.7T, Audi C5 Allroad Quattro 4.2L, Audi C5 S6, Audi RS6. ... This solar sunroof panel helps power the vent fan for reticulating fresh air into the cabin on a hot day keeping your car comfortable ...

The Audi's interior got up to 107, 15 degrees cooler than closed. Since the Audi is a much darker color than the Sequoia I would have expected the Audi to get hotter. However, that was not the case. It certainly seems that the solar sunroof was good for at least a 15 to 22 degree drop, if not more.

Audi Forums A4 Series. A4/A4 cabriolet/S4 (B6 chassis) . B. batty Registered User ... do you know of an option on a 2004 model for a solar sunroof ? what does it control, and how much was it when new? have seen an A4 avant tdi with this option, but it seems very expensive. cheers . D. dualmono21

I am posting to gauge interest in a full Carbon Fiber sunroof glass REPLACEMENT option for the B6/B7 A4/S4/RS4 Chassis. Similar to the one 2Bennett sells for the B5 chassis. I recently replaced my glass due to a rock hitting and shattering it and came across the 2Bennett option but iirc the B5 will not work. This will however be a complete bolt on glass replacement ...
