

Australian renewable energy agency

When it is produced using renewable energy or processes, hydrogen is an emissions free fuel and becomes a way of storing renewable energy for use when it is needed. Hydrogen energy can be stored as a gas and even delivered through existing natural gas pipelines.

ARENA is the Australian Renewable Energy Agency. We were established by the Australian Government on 1 July 2012. We support the global transition to net zero emissions by accelerating the pace of pre-commercial innovation, to the benefit of Australian consumers, businesses and workers.

We support the global transition to net zero emissions by accelerating the pace of pre-commercial innovation, to the benefit of Australian consumers, businesses and workers. Seek Funding. We fund projects that can help accelerate renewable energy in Australia. Explore Projects.

Concentrated solar thermal harvests the sun's heat to produce large-scale power generation. It uses a field of mirrors to reflect sunlight onto a device called a receiver, which transfers the heat to a thermal energy storage system. Energy can then be released from storage as required.

On behalf of the Australian Government, the Australian Renewable Energy Agency (ARENA) has today opened applications for the \$2 billion Hydrogen Headstart program. Announced in the 2023-24 budget, the program aims to catalyse Australia's hydrogen industry to take advantage of Australia's unparalleled opportunity to be a global hydrogen leader.

Emerging Australian technologies & businesses that can accelerate Australia's transition to a renewable energy economy. Status: Ongoing. We accelerate the affordability of new technologies and build investor confidence in renewable energy ...
