

Bamako water storage project latest

How can water supply be improved in Bamako?

Improved water storage and distribution networks, along with increased household connections and standpipes where required, will make it possible to supply water to many unserved areas in Bamako and neighboring communes.

Does Bamako have a sewage system?

Sewer networks are almost nonexistent in Bamako and 98 percent of the population still relies on on-site sanitation facilities. The capital has no regulated sewage sludge treatment facilities, owing in part to the challenges associated with securing sites.

Does Bamako have sewage sludge treatment facilities?

The capital has no regulated sewage sludge treatment facilities, owing in part to the challenges associated with securing sites. The proposed investments are designed to rehabilitate the Noumoubougou landfill to provide the Greater Bamako area with treatment capacity for 20 years.

How will Bamako sludge treatment plant be expanded?

This capacity will be expanded through the modernization of the existing unit, providing additional capacity of two million metric tons over the remaining 40 hectares of the site. Two fecal sludge treatment plants will be built to address the current lack of any kind of proper sanitation system in Bamako.

PROJECT LOGICAL FRAMEWORK A PROJECT INFORMATION Project Name and SAP Code: Support Project to Build Resilience to Climate Change and COVID-19 in Bamako Through the Kabala Drinking Water Supply (DWS) Project - Phase 3 - P-ML-E00-010 Country/Region: Mali Project Development Goal: Contribute to building the resilience of the inhabitants of Bamako ...

With 189 member countries, staff from more than 170 countries, and offices in over 130 locations, the World Bank Group is a unique global partnership: five institutions working for sustainable solutions that reduce poverty and build shared prosperity in developing countries.

Some neighbourhoods of Bamako suffer from water shortages, particularly at the end of the dry season. Key objectives of the Kabala 2 - Eau et Assainissement project: Double the capacity of the Kabala water treatment plant. Construct new reservoirs and extend the water distribution network. Connect 34 000 households to the network
