The average car battery life (called the service life) is three to five years. Battery degradation increases when exposed to heat, which is why batteries often have a longer life in the cooler north. By the fourth year of your battery's service life, it's a good idea to purchase a new car battery before the current one fails.

What is a Car Battery? A car battery is a battery designed primarily for engine starting. Unlike other types of battery (such as leisure batteries) which are designed to perform best under slow drain situations, a car battery must be able to push a high burst of energy which will allow the car engine to start.. As the car battery is the heart of your vehicle's electronics system, we ...
