Twelve (12) worlds in a multi-star system are home to the Twelve Colonies of Man. According to the ancient writings, the Twelve Colonies were settled by those who journeyed from a mother world ...

After Galactica escapes the destruction of the solar system by the nova, Lt. Gaeta analyzes the data Tyrol

Battlestar galactica solar system

brought back on the temple and the nova. He surmises that the nova was an astrological marker which points the way to the remains of another supernova some 13,000 light years away in the Ionian system (TRS: "Rapture"). Notes

Summary. Thirty years after the destruction of the Colonies, the Fleet receives information from remote probes that they have at last found Earth.; Adama and Doctor Zee, a child genius that advises the Commander, discover that they have arrived at Earth in 1980, but the planet's inhabitants, descendants of the Thirteenth Tribe, are at a low level of cultural and ...

Statements such as "[Earth's] proximity to the sun provides the only climate in the galaxy comfortably able to support life as we know it" (Galactica Discovers Earth, Part I) suggests a colonial "galaxy" may in fact be the same thing as a star/solar system. Thus the Cyrannus "galaxy" may in fact consist only of a handful of stars and planets ...

"Imperial" Virgon is a temperate planet in the Cyrannus Star System, orbiting Helios Beta. It was the second largest of the habitable planets, smaller only than Leonis. It is named after the Virgo tribe who resided on Kobol, though its citizens may not have been affiliated with that tribe. Following the conclusion of the Gemenese dark age and humanity's reinvention of space ...

For subjects with a similar name, see: Cyrannus. The Cyrannus galaxy is the location of the Twelve Colonies of Man.. The Fleet passes through a swath of asteroid dust during its exodus from the Colonies in 7348, separating the outer periphery of the Cyrannus galaxy from other regions disconnected from the Colonies during the Thousand-Yahren War (TOS: "The Long ...

Sorry to hijack your thread, but I had no idea that the 12 colonies were around 4 different stars. But this is one solar system? How are the stars arranged? I always thought (incorrectly, I guess) that it was a single star with 12 populated planets and/or moons, all within the circumstellar habitable zone... kind of like the solar system of ...
