Tesla Powerwall+ A well-rounded and expandable home battery backup EcoFlow DPU + Smart Home Panel 2 A portable battery that can function as your whole-home backup solution Anker Solix X1 A home backup system with a modular installation Generac PWRcell A home battery backup system that's compatible with third-party solar panels Enphase IQ

What makes a good UPS battery backup?

Even if you're not prone to power outages, many UPS models also include surge protection features. An automatic voltage regulator smoothes over brownouts and spikes without needing to change your battery. It's one of several capabilities you'll want to look for in the best battery backups.

Is a whole home battery backup system worth it?

You'll need about three times as much power for a whole home backup system, which is about three times the price of a partial home setup. Partial home battery backup systems generally make more sense for the average American home, but a whole-home setup may be worth it if you live in an area with frequent blackouts.

Do I need a battery backup system?

Given that power outages are infrequent in most parts of the country, a partial-home battery backup system is generally all you'll need. But, if your utility isn't always reliable for power, whole-home battery backup may be the way to go. How much of my house can I run on a battery?

Are UPS battery backups reliable?

We've chosen some robust and ultra-reliable UPS battery backups from some of the most respected brands in the industry. These systems offer robust battery backup for all your devices, fast-charge ports for portable devices, and advanced surge protection, among other great features.

Which APC battery backup is best?
