What is a power control system for a motorhome?

Precision Circuits Inc. has been supplying energy management systems to motorhome manufacturers since 2006. Its Power Control System (PCS) consists of a breaker panel that contains an integrated control module with imbedded relays and control logic circuitry. The system can shed up to four AC circuits and three additional DC circuits.

How does an energy management system work in a motorhome?

In any case, an energy management system offers seamless operation of a motorhome's electrical accessories and eliminates treks to the campground pedestal or generator to reset tripped breakers. The devices found in energy management systems prevent breakers from tripping by monitoring power usage and adjusting electrical loads.

Can a 50 amp electrical system run a motorhome?

Many RV parks have stepped up to meet the demand by providing electrical systems that can handle modern RVs, but there may be times when only a 30-amp power supply is available to run a motorhome's 50-amp electrical system.

What are the benefits of using an EMS for an RV?

The benefit of this setup is that your RV hookup process will return to being as simple as plugging in your power cord to the desired pedestal once you've installed the EMS. Made for RVs that require a 50 amp connection, it's rated to protect your RV and its appliances from power surges up to 3,850 joules.

What is the power requirement for an RV?

The power requirement for an RV depends on the specific RV model. Your RV's power cord will either be 30 amp or 50 amp. To determine which one your RV has, check the prongs on the power cord. A 30 amp connection has three prongs, while a 50 amp connection has four prongs.

Should I install an EMS or surge protector in my RV?

The electrical system that comes installed in your RV is set up a certain way for a reason. While installing an EMS or surge protector adds an important degree of protection and safety, improper installation can result in all sorts of prolonged and dangerous electrical issues.
