

Best power backup for computer

What makes a good UPS battery backup?

Even if you're not prone to power outages, many UPS models also include surge protection features. An automatic voltage regulator smoothes over brownouts and spikes without needing to change your battery. It's one of several capabilities you'll want to look for in the best battery backups.

Which APC battery backup is best?

The APC BR1500G is an excellent battery backup with AVR and surge protection. It allows for easy cell replacement and the ability to add external backups. If you need a UPS and don't want to spend a lot, the APC UPS BE425M Battery Backup is for you.

What are the best UPS devices?

So what follows is a considered and varied list of best UPS devices, which should sort you out in a pinch. If you refuse to settle for anything less than the best, the APC Back-UPS PRO 1500VA is the right uninterruptible power supply for you.

Are UPS battery backups reliable?

We've chosen some robust and ultra-reliable UPS battery backups from some of the most respected brands in the industry. These systems offer robust battery backup for all your devices, fast-charge ports for portable devices, and advanced surge protection, among other great features.

Why do I need a battery backup?

In order to protect your computer against power supply interruptions, you need a battery backup. UPS units are like power strips that contain a big battery inside, providing a buffer against power supply interruptions. This buffer can range from a few minutes to an hour or more depending on the size of the unit.

How much power do you need for a battery backup?

However, you'll need to make sure that your supply has enough output power for the job. In general, the best battery backups can output at least 400W. UPS models include several different features, but you'll want to focus on a couple, depending on what you want to back up.
