The only mod with dynamos is Thermal Series, and from what I can tell (I am hardly an expert on them) they top out at 200 rf/tick (I may be missing something though, like I said, I know very little about them), while a Nitro Thermo Generator tops out at 13,440 FE/tick, and since I understand rf/FE is 1:1, that is about 650 times more power output.

These two lessons and immersive worlds encourage students to explore different energy sources, solve a town's power problems, and design and manage a sustainable city - all in Minecraft.

The items in this mod are balanced to fill some small gaps between each tier of vanilla Minecraft, while being unique enough to stand out. This mod is designed and balanced in the style of Minecraft pre-1.8 beta. Please keep this in mind when using this mod. Textures are not in line with the modern Minecraft textures.

The first thing I build is a Thermal Dynamo (from Thermal Series) to get my initial few items then it's all mekanism. Wind Generator (Windmill) can get you 100-150 rf a tick. Then I build ...

Piggy bagging on this comment, Heat Generator From Mekanism is a great early game energy source. It only need copper and couple other vanilla's item, and just cover all the sides with lava and water-logged the heat generator, I believe it will generate 40++ rf/t with just 7 bucket of lava. Mekanism's universal cable can be water-logged as well.
