

Renewable Energy Development in the California Desert. Photo by Tom Brewster. WASHINGTON -- The Biden-Harris administration today announced a series of historic milestones and actions to promote responsible clean energy development on public lands and help achieve President Biden's goal of creating a carbon pollution-free power sector by 2035. ...

Together, the funding will help make clean energy more affordable and reliable, create good-paying jobs, and enhance U.S. economic growth and competitiveness. Developing more solar power, the cheapest form of new electricity supply, is key to achieving President Biden's goal of 100% clean electricity by 2035.

The Budget supports clean energy workforce and infrastructure projects across the Nation and invests \$1.8 billion in low-income Americans' homes, including \$375 million for DOE Weatherization ...

President Joe Biden authorized the Defense Production Act to spur US manufacturing of solar and several other forms of clean energy, the White House announced Monday.. Biden authorized the Energy ...

WASHINGTON, D.C. -- As part of President Biden's Investing in America agenda, the U.S. Department of Energy (DOE) today announced 12 projects, whose work will span more than 13 states, selected for negotiation to launch training partnerships that expand the solar energy workforce in underserved and underrepresented communities, as well as create career ...

Investment in Solar Deployment Supports the U.S. Clean Energy Revolution. Solar will play an important role in reaching President Biden's 2035 clean electricity goal - alongside other sources ...

WASHINGTON, D.C. -- The U.S. Department of Energy (DOE) today released details for 35 projects across 20 states that voluntarily shared with DOE they received a total of \$1.93 billion in allocations of the Qualifying Advanced Energy Project Credit (48C). 48C is an allocated tax credit funded by President Biden's Investing in America agenda through the ...

The White House also released a detailed description of this plan: The Federal Sustainability Plan: Catalyzing America's Clean Energy Industries and Creating Jobs Through Federal Sustainability.

The DPA determinations are part of the Biden-Harris Administration's plan to lower energy costs for families, strengthen national security, and achieve lasting American energy independence that reduces demand for fossil fuels and bolsters our clean energy economy. "President Biden has invoked the Defense Production Act so that the U.S. can ...

WASHINGTON, D.C. -- As part of President Biden's Investing in America agenda, the U.S. Department of

## Biden clean energy plan solar

Energy (DOE) today announced up to \$475 million in funding for five projects in Arizona, Kentucky, Nevada, Pennsylvania, and West Virginia to accelerate clean energy deployment on current and former mine land. This funding--made possible by the ...

Announced actions from seven agencies on clean energy deployment, including new investments and partnerships to advance offshore wind; steps to fast-track solar, onshore wind, and geothermal ...

Currently, nearly 40% of all carbon dioxide pollution comes from power plants burning fossil fuels to create the energy we use every day. That means we need to revolutionize how we generate and use electricity, by making renewable energy sources like wind and solar more abundant, more affordable, and more accessible to everyone.

Promoting Development of Renewable Energy on Public Lands: This month DOI issued a final rule to reduce fees for solar and wind projects on public lands by 80 percent and announced that DOI has ...

The White House's Build Back Better plan unveiled Thursday represents the biggest clean-energy investment in U.S. history, with a \$555 billion package of tax credits, grants and other policies ...

President Biden's Executive Order 14057 on catalyzing American clean energy industries and jobs through Federal sustainability and accompanying Federal Sustainability Plan (collectively referred to as "The Federal Sustainability Plan") sets out a range of ambitious goals to deliver an emissions reduction pathway consistent with President Biden's goal of reducing U.S. ...

August 9, 2024. The Biden-Harris Administration's Investing in America agenda is driving the largest clean energy investment in history, unleashing a manufacturing and deployment boom that has ...

The Department also announced that more than 10 gigawatts of clean energy are currently being generated on public lands with the completion of two new solar projects, and that the Administration ...

The plan "presents a significant risk to the rapid deployment of solar energy in the Western United States, in direct conflict with the policies and actions of the federal government to deploy clean energy and cut carbon and air pollution," EDF Renewables, a French energy company with projects in the US, told the land bureau.

The Biden-Harris Administration, through the U.S. Department of Energy (DOE), today launched new initiatives to connect families to more reliable clean energy, lower electricity bills, and create good-paying jobs in the domestic solar industry.

The clean energy portion of the Democratic bill for solar, wind and battery storage will cost more than \$130 billion over 10 years. To get a sense of the potential impact of the legislation, we ...

These programs will provide \$8.5 billion to states and territories to lower energy costs and increase efficiency

## Biden clean energy plan solar

in American homes by making home energy upgrades more affordable, while ensuring all communities have access to affordable, reliable, clean electricity and helping deliver on the President's ambitious clean energy and climate goals.

The Biden administration plans to eliminate fossil fuels as a form of energy generation in the U.S. by 2035. The White House set out a target of 80% renewable energy generation by 2030 and 100% ...
