

(Gina Ferazzi / Los Angeles Times via Getty Images) Renewable energy companies are deploying a former aide to President Joe Biden to lobby the White House on the specifics of its proposed \$2 trillion infrastructure package that would provide huge windfalls for the industry.. Christopher Putala, a former Biden staffer on the Senate Judiciary Committee from ...

The first big energy transition was from wood and charcoal to coal, beginning in the iron industry in the early 1700s. By 1900, coal was the primary industrial fuel, taking over from biomass to ...

This campaign fits into a broader pattern of lobbying by the fossil fuel industry to hinder effective climate action and highlights the importance of democratic integrity in addressing the climate ...

Instead of giving renewable energy a bigger voice in Washington, ACP's goal when it was formed two years ago, critics say the lobbying group risks being used to amplify the message of the ...

demonstrate that Big Oil companies: seek to position natural gas as a "bridge fuel" between coal and cleaner, renewable energy, while enmeshing natural gas in the U.S. energy economy. for the long-term; seek to portray natural gas as a green, climate-friendly fuel, while. internally acknowledging that there is significant scientific ...

At the time of writing, OpenSecrets reports Sen. Joe Manchin has received \$1,128,517 received \$1,086,567 from the oil and gas industry since becoming a politician.. During the 2021-22 election cycle, Manchin was the top recipient from lobbyists in the coal mining, oil and gas, tobacco, savings and loans industries according to opensecrets .. With the Senate ...

Action is urgently required. In 2018 the International Panel on Climate Change (IPCC) called for "rapid, far-reaching and unprecedented changes in all aspects of society" to limit global warming to 1.5 degrees C (IPCC, 2018).And in the BP Statistical Review of World Energy 2020, the share of primary energy produced from renewable sources in South Africa in 2019 ...

More than \$2 billion was spent on lobbying climate change legislation in the United States from 2000 to 2016, with the fossil fuel industry, transportation companies, and utilities outspending environmental groups and the renewable energy industry 10 to 1, according to a new analysis published in the journal Climatic Change.. The amount of money spent influencing ...

But we do have an alternative: renewable energy. This means primarily wind and solar energy, although other energy sources (e.g., geothermal) will also play a role. Non-renewable energy sources such as nuclear could

provide another source of climate-safe energy. The amount of renewable energy available is almost unfathomable.

The four oil companies and API have publicly embraced carbon pricing as a way to address the greenhouse gas emissions that drive climate change, yet less than 0.4% of their ...

America's fossil-fuel lobby is well-organised, ruthless and dug-in on the right. Once scattered across the country, it is concentrated in a handful of those same conservative states,...

It's happened because of the threat against coal, the war against coal. I mean billions of dollars within our state have been created as a result of the mining of coal and we get a lot of benefit as a result of coal, jobs, taxes. Jonathan Jones: Together, the coal mine and the power plant are the two largest employers in the Colstrip area.

Meng and Rode estimate that lobbying against the bill between July 2009 and the end of 2010 reduced the probability of passage from 55% to 42%, representing a welfare loss of US\$60 billion ...

The accusation that coal, oil and natural gas supporters outspend the environmental movement on climate lobbying is based on assumption that fossil fuel corporations themselves lobby against climate action measures, but corporate lobbying isn't a monolith. These claims often

Substantial renewable energy (RE) cost reductions have raised the prospect of a subsidy-free RE era of the energy transition. The envisaged policy cornerstones of this era are carbon markets ...

The association of power companies working under the "Magritte Group" umbrella, called on Tuesday (8 December) for carbon pricing, rather than renewable energy targets, to be the main tool for ...

Just days before Mr. Trump was sworn in, Peabody Energy wrote a letter to the plant owners, which included the Interior Department, offering to cut the price of the coal it sold to N.G.S. in ...

Despite voting to remain a member of an Australian coal lobby group, there are growing divisions between fossil fuel extractors and the larger energy industry. Politicians must mine the divide ...

More than \$2 billion was spent on lobbying climate change legislation in the United States from 2000 to 2016, with the fossil fuel industry, transportation companies, and utilities ...

It campaigns against regulations in the coal sector and climate protection. The conservative American Legislative Exchange Council is composed of state legislators and financed partly by money from the energy sector, including Big Coal. In 2013/14, it was active in at least 16 states working against renewable energy.

ONE WAY TO read the Democrats' wished-for budget bill is that it signals a new age of renewable energy in America. Once a laggard by European standards, the fast-growing industry is central to ...

On February 9, 2016, the Supreme Court placed a hold on the Environmental Protection Agency's (EPA's) Clean Power Plan, the first-ever limits on heat-trapping carbon dioxide pollution from power plants "s the latest development in a disinformation campaign perpetrated by fossil fuel and utility interests to stop EPA action on climate change.

Between 2009 and 2020, none of the four companies generated renewable energy on a scale that would "indicate a shift away from fossil fuels", despite all showing a significant increase in ...

Big oil companies are spending millions to portray themselves as taking action on climate change, but their investments and lobbying activities don't live up to their planet ...

The recent surge in lobbying by energy companies coincides with increasing public concern about the climate crisis, and a bevy of new ... both coal- and gas-fired power plants in recent years. Arclight and ... rather than investing in renewable energy and energy storage. JCOPE disclosures show that Astoria Generating/Arclight has retained
