

## Bills about solar energy in wyoming

Does Wyoming offer solar incentives?

Wyoming doesn't have any state-wide solar incentives, but you can still save with the Federal Tax Credit, net metering and several other incentives. Let's dive into all Wyoming offers for residents looking to switch to solar energy. Through the Inflation Reduction Act, Wyoming residents are eligible for a 30% Investment Tax Credit.

Are solar panels tax deductible in Wyoming?

All Wyoming homeowners who own their systems qualify for the federal solar investment tax credit (ITC). This allows you to claim 30% of your solar installation costs on your federal taxes. The credit also applies to stand-alone solar battery installation. Note that the federal tax credit is not a rebate or cash payment.

Does Wyoming have a solar tax credit?

Through the Inflation Reduction Act, Wyoming residents are eligible for a 30% Investment Tax Credit. You can receive a 30% solar tax credit for your solar system from now through 2032. In 2033, the credit drops to 26%, in 2034, it drops to 22% and in 2035, the credit ends if Congress decides not to renew it.

Should you go solar in Wyoming?

Wyoming also has some of the cheapest electricity rates in the country, whereas solar panel system installation is an expensive affair. There are no state-level incentives aside from retail-rate net metering, and the biggest draw to going solar in the Cowboy State is the major clean energy tax credit bolstered by the Inflation Reduction Act.

Is solar in Wyoming worth it?

While Wyoming doesn't offer a long list of incentives for going solar, doing so in the state is likely still worth it. The overall energy savings coupled with the federal tax credit help homeowners who install solar realize an average of several thousands of dollars in savings over the system's life span.

Is Wyoming a good state to install solar panels?

If you think about installing solar panels, Wyoming is a nice state for that. There's always enough sunshine to cover your basic energy needs or at least to reduce your monthly electricity bill. The 26% Federal Solar Tax Credit as well as some local incentives will make your solar installation even more profitable. How much sun is there in Wyoming?

The average Wyoming homeowner will save \$3,922 over 25 years (the warranty term of most solar panels) on electric bills by going solar. The best part is that your system will pay for itself in an average of just 14.43 years.
