Behind-The-Meter (BTM) energy storage involves integrating energy storage systems, such as batteries, allowing users to store excess electricity for future use. This approach, highlighted in emerging markets like data centres, aims to address peak demand costs, enhance grid stability, and provide backup power during outages in regions with unreliable power grids.

Notice is hereby given in terms of the Environmental Impact Assessment (EIA) Regulation 41(2) (a)(i) promulgated under National Environmental Management Act (Act 107 of 1998) Regulations, Government Notice Regulation (GN R) No. 326 in Gazette 38282 on 07 April 2017 for an intention to undertake an Environmental Authorisation (EA) application ...

2 · Calibrant Energy this month completed a 100% acquisition of Enel X Storage LLC, the DES business from Enel X North America Inc., for an undisclosed amount. Per the company, Calibrant now takes over Enel's more than 330 MWh of behind-the-meter battery energy storage projects (BESS) already in operation or under construction across North America.

Figure 1 - Typical behind-the-meter energy storage system Technology stack. Once the power rating has been selected, an energy duration level must be chosen. Like the power rating, the energy duration of the system is dependent on the particular application it will ...
