SunFunder is a specialist solar finance company that unlocks debt capital for companies and projects in the off-grid, mini-grid and commercial and industrial solar sectors in emerging markets. ... Its real-time grid management solutions offer a highly cost-effective way to get ready for a "new energy" future by creating greater grid ...

BNEF New Energy Outlook gives a long-term scenario analysis on the future of the energy economy. These sector and regional reports go into even more detail. ... businesses and civil society now have the opportunity to accelerate the deployment of mature clean technologies such as solar, wind and electric vehicles as well as the development of ...

All respondents, in Bloomberg New Energy Finance's 2021 Bankability Survey, have voted Trina Solar as bankable, making Trina Solar is the only module manufacturer to be rated as bankable for six consecutive years by all industry respondents who participated in the annual surveys.

Solar power, once so costly it only made economic sense in spaceships, is becoming cheap enough that it will push coal and even natural-gas plants out of business faster than previously forecast.

The two big changes to the 2015 total are an upward revision of \$29bn to asset finance of utility-scale wind and solar projects - mainly in China and the US - and a downward revision of \$10bn to spending on small

distributed capacity, such as rooftop solar, particularly in Japan. ... The revised annual data show that overall clean energy ...

Low prices of solar modules are likely to continue to boost global solar PV installations in 2024, according to Bloomberg New Energy Finance (BNEF), which forecasts 592 GW of modules to be deployed this year. It will be a 33% annual increase over 444 GW, said the research organization in its 3Q 2024 Global PV Market Outlook.

The BNEF Summit has been convening leaders in energy, industry, transport, technology, finance and government since 2008, generating ideas, delivering insight, and making the connections that help them formulate successful strategies, capitalize on technological change and shape a cleaner, more competitive future.
