

Bloomberg solar energy index

What is a solar energy index?

Index is comprised of companies active across the solar energy value chain including the manufacture of solar energy equipment and the financing, development and operation of projects.

Is the global solar market hitting record highs?

By Jenny Chase, Solar, BloombergNEF The global solar market is hitting record highs in volume of installations, and new lows in the price of modules.

How big is the solar industry in 2023?

By Jenny Chase, Solar, BloombergNEF The photovoltaic industry added about 44.4 gigawatts of new capacity in 2023, a 76% growth on 2022 build. Prices of solar modules are at record lows, and supply of components is plentiful. End-user markets are booming while manufacturers struggle to make a profit. Installations this year will top 520GW.

Will wind and solar power meet a tenth of global electricity demand?

London, S&P; Paulo - The world's wind and solar projects combined to meet more than a tenth of global electricity demand for the first time in 2022, according to research company BloombergNEF (BNEF).

Why has BloombergNEF increased its build forecast again?

BloombergNEF has increased its build forecast yet again, particularly due to acceleration in China but also due to rapid build in other established markets, and updates on the global situation as of 3Q 2023. Polysilicon makers have reduced production a little, and prices have stabilized, but we still expect huge oversupply in 2H 2023.

Are solar panels a challenge to forecasting growth?

"The challenge in making forecasts is that if you keep predicting growth at current rates, you end up forecasting the entire world being covered with solar panels," Jenny Chase, a solar analyst at BloombergNEF, told pv magazine.

Solar energy share prices fell about 8% in 1H, based on the median company in BI's solar theme basket, which compares with a 21% drop in Bloomberg's world index. Global solar demand is on track to ...

Wind, solar and nuclear start to displace existing fossil-fuel generation in the power system and meet new power demand. The second-biggest driver is electrification of end uses such as EVs, heat pumps in buildings,

The hedge funds' bets have coincided with a wave of momentum that's been building against key corners of the green economy. Since a recent high in 2021, the S&P Global Clean Energy Index has ...

Bloomberg solar energy index

The solar equipment company didn't prove Solar Liberty Energy Systems Inc. attempted to sway the testimony of the Advanced Energy whistleblower Norman Smith through monetary payouts, according to the report and recommendation opinion filed Monday in the US District Court for the Western District of New York.

3 days ago· Solar firms were hit especially hard: Sunnova Energy International Inc. was down as much as 51%, First Solar Inc. fell as much as almost 20% and Sunrun Inc. was down as much as 29% in New York.

The New Energy Outlook presents BloombergNEF's long-term energy and climate scenarios for the transition to a low-carbon economy. Anchored in real-world sector and country transitions, it provides an independent set of credible ...
