

Blue power solar

What types of solar panels does Blue Raven offer?

Blue Raven doesn't offer specific types of panels, instead sourcing them based on what options are most readily available in each local market, including brand names like REC, SEG, Maxis, SunPower, Qcells and others. Some are among the most efficient on the market. "It's more about the system's size to us than the brand," Hoffman explained.

Is bluepower a good solar loan option?

BluePower Plus+: The company's BluePower Plus+ plan is an excellent solar loan option if you're eligible. With this plan, you can enjoy the first 18 months of solar payments without any charges. Moreover, you may benefit from zero upfront costs for solar system design, permitting and installation.

Who owns Blue Raven solar power?

Since Blue Raven began in 2014, it has grown from three employees to over 3,000 team members. Following years of rapid expansion, another solar power company, SunPower, acquired Blue Raven in 2021. Anyone living in the areas that Blue Raven serves who wants to go solar without breaking the bank will appreciate the company's financing options.

Why are blue solar panels better than monocrystalline solar panels?

The multiple crystals in the formation process create less silicon waste and require less energy than the monocrystalline process. It makes the blue-colored solar panels less expensive, but it also means blue panels are less efficient. Which Color is Better for My Home Solar Power System?
