

What is Bosideng's 'fusion' capsule collection?

On July 8, the fashion show of Bosideng's 'Fusion' capsule collection promises to be a must-see event for art, fashion, and culture enthusiasts. By presenting a modern vision of Chinese heritage, Bosideng aims to redefine expectations for Chinese brands and celebrate the richness of traditional craftsmanship in a contemporary context.

When will Bosideng's 'fusion' capsule collection show take place?

PARIS, July 03, 2024 -- ( BUSINESS WIRE )--On July 8, 2024, high-end ready-to-wear brand Bosideng will showcase its 'Fusion' capsule collection fashion show as part of the 'REVIVING CRAFT' exhibition at the Musée des Arts Décoratifs in Paris.

What is 'reviving craft' & 'Bosideng'?

The 'REVIVING CRAFT' exhibition will be structured around the symbolic themes of Metal, Wood, Water, Fire, and Earth, illustrating the philosophies of harmony and renewal dear to Chinese culture. Bosideng will embody the concept of 'Earth', emphasizing its deep roots in Chinese cultural heritage.

In the present study, a two-dimensional CFD approach has been chosen to investigate heat transfer in a packed bed filled with phase change materials (PCM) capsules. In this research, four different geometries, circular, hexagonal, elliptical, and square, are considered PCM packages made of KNO<sub>3</sub> covered with a copper layer and NaK as heat transfer fluid ...

Ice-spherical capsule thermal energy storage system with glycol-water flowing in the axial direction has been analyzed theoretically and experimentally. The one-dimensional porous-medium model for analysis of the present system. Five independent parameters (the diameter of the spheres, the thickness of the sphere, the material of the sphere ...

Latent heat thermal energy storage (LHTES) captures the thermal energy via a solid-liquid phase transition that occurs in phase-change materials (PCM). The PCM is usually encapsulated in some way. In this study, we consider PCM melting in a vertical cylindrical enclosure, that is a prototype of a capsule used in a future storage system.

Huafu High Technology Energy Storage Co., Ltd. Phone +86 13739180924. Email. [rosa@huafubattery](mailto:rosa@huafubattery) . Address. No.100 Bosideng Road, Gaoyou, Yangzhou City, Jiangsu Province, China. Send Message. We sincerely welcome friends from all over the world to cooperate with us on the basis of long-term mutual benefits. We are looking forward to ...

The cooling energy storage capacity of each capsule is compared in Fig. 10. Apparently, pure water without

fin has the highest capacity of cooling energy storage which is  $322.8 \text{ kJ?kg}^{-1}$  under the condition of  $T_i = 276.15 \text{ K}$ ,  $T_c = 268.15 \text{ K}$ . With the addition of fin-I and fin-II series, approximately 0.9% ~ 1% storage capacity is lost.

The PLTES device is primarily composed of the thermal energy storage tank, spherical PCM capsules, HTF, and distributor. In this device, the high-temperature HTF flows into the tube from the bottom and exits from the top of the tank [24,25]. The specific structure of the device is depicted in Fig. 1(a).

Phase change materials (PCMs) are gaining increasing attention and becoming popular in the thermal energy storage field. Microcapsules enhance thermal and mechanical performance of PCMs used in the... Skip to Article Content ... The results indicated that the capsules obtained at the pH value of 11, 11.5, and 12 had an average particle size of ...

The packed-bed thermal energy storage system (PBTES) has broad application prospects in renewable energy, such as for solar, hydraulics, biomass, and geothermal. This study varied the capsule diameter arrangement of the PBTES using a genetic algorithm (GA) to optimize the thermal performance of the cascaded three-layer PBTES during charging.

select article Smart-responsive sustained-release capsule design enables superior air storage stability and reinforced electrochemical performance of cobalt-free nickel-rich layered cathodes for lithium-ion batteries. ... [Energy Storage Materials Volume 62 (2023) 102925]

The spherical capsule is one of the most common geometrical configurations for latent heat thermal energy storage. This study develops a modified heat capacity method coupling with the volume of ...

The design, in which the capsules are packed in the bed at different sections based on the Phase Change Material (PCM) melting temperature, is an effective method to improve the heat-storage performance of the latent heat energy storage system. A latent heat storage system was established in the present study in order to optimize the arrangement of ...

Energy storage is an attractive option to conserve limited energy resources, where more than 50% of the generated industrial energy is discarded in cooling water and stack gases.

Thermal energy storage (TES) can address the mismatch in an energy supply and demand system by absorbing and releasing heat, which is an effective solution for the intermittency of renewable energy [[1], [2], [3], [4]]. Moreover, a TES system, combined with equipment such as a steam generator or air-conditioning system, can be utilized in various ...

Herein, a photothermal energy-storage capsule (PESC) by leveraging both the solar-to-thermal conversion and energy-storage capability is proposed for efficient anti-/deicing. Under ...

For the 4 mm capsule packed bed system, it is seen that depending upon the total energy requirement, the energy storage rates are highest for either  $r/R = 0.333$  or  $r/R = 0.416$ , while for the 8 mm ...

In this paper, a new two-layered high-temperature packed-bed thermal energy storage system (PBTES) with changed-diameter macro-encapsulation capsule has been established to improve the thermal ...

RSS capsules containing PCMs have improved thermal stability and conductivity compared to polymer-based capsules and have good potential for thermoregulation or energy ...

A model for a packed bed latent heat thermal energy storage using spherical capsules is developed in the present study to predict the thermal behavior of the system. This study investigates the effects of heat transfer fluid inlet temperature, mass flow rate, phase change temperature range and the radius of the capsule on the dynamic response ...

Packed-bed thermal energy storage (PBTES) systems utilizing phase change capsules have found extensive applications in thermal energy harvesting and management to alleviate energy supply-demand ...

Hisham H. Ettouney et al. [25] focused a study on heat transfer enhancement in energy storage of spherical capsules filled with paraffin wax and metal beads. By 2% metal beads in sphere capsules ...

1 Copper-Alumina Capsules for High-Temperature Thermal Energy Storage Bo Zhaoa, Renjie Liua, Nan Shenga, Yasser Mahmoudib, Chunyu Zhua\* a School of Low-Carbon Energy and Power Engineering, China University of Mining and Technology, Xuzhou, 221116, China b School of Engineering, The University of Manchester, Manchester, M13 9PL, UK \*Corresponding ...

capsules for thermal energy storage and other industrial. processes were reported. 2. Phase Change Materials (PCMs) PCMs have a high heat of fusion in general and can store/

(3) The thermal behavior of the system is further investigated under different inlet conditions and tank height-to-diameter ratios, and the findings reveal that arranging the equal PCM encapsulated spheres in each layer and applying variable capsule sizes concerning phase change temperatures will regularly influence the energy storage process.
