Regulatory mandates and government policies for renewable energy & climate monitoring boost growth of energy management systems & provide new avenues for market WILMINGTON, DE, UNITED ...

Botswana has intensified efforts to make the country self-sufficient and energy secure through bridging the demand gap. Ministry of Minerals and Energy"s chief public relations officer, Mr Neo Sealetsa told BOPA in an interview on Saturday that efforts were continually being made and remedial measures were in place to bridge the demand gap for the energy sector in the ...

Following in the footsteps of other southern African countries, the Botswana Energy Regulatory Authority (BERA) has started to operate in bids to ensure that proper procedures are adhered to. The chief operating officer at BERA, Duncan Morotsi, vowed that the body will ensure that the country has uninterrupted supply of power, the Patriot reported.

It is anticipated that Botswana will need 140 MW of battery energy storage capacity by that time. Currently, 97% of Botswana's electricity is generated from coal, and the country imports electricity from neighbouring South Africa, via its state-owned utility Eskom.

This new World Bank project will finance the necessary grid investment and Botswanas first 50MW utility-scale battery energy storage system to enable the first wave of renewable energy generation to be smoothly integrated and managed in the grid. In addition, the World Bank project will support the Government of Botswanas continued effort to ...

The US energy storage industry enjoyed another quarter of record growth in Q2 2023, with 1,680MW/5,597MWh of new installations tracked by Wood Mackenzie. The research and analysis group has just published the newest, Q3 2023 edition of its US Energy Storage Monitor report in partnership with the American Clean Power Association (ACP) trade group.
