

# Bulgarian energy storage battery

What is the largest battery energy storage system in Bulgaria?

The system is the largest in Bulgaria. Image: Renalfa IPP. A 25MW/55MWh battery energy storage system (BESS) has been commissioned in Bulgaria, Eastern Europe, by operator Renalfa IPP, using technology provided by Chinese firms Hithium and Kehua.

Why do we need energy storage solutions in Bulgaria?

Establish a reliable energy system with greater share of intermittent generation. In the context of Bulgaria's energy landscape, energy storage solutions present a diverse array of benefits to various stakeholders stemming from its unique ability to time-shift energy and rapidly respond when called upon. The applic

What are Bulgaria's energy storage subsidies?

The subsidies are for battery systems required to be installed together with renewable electricity plants of at least 200 kW in capacity. Following a three-month delay, the Ministry of Energy of Bulgaria combined five planned procedures for grants for energy storage facilities into three and launched calls for two of them.

What is a Bulgarian energy storage grant?

Following a three-month delay, the Ministry of Energy of Bulgaria combined five planned procedures for grants for energy storage facilities into three and launched calls for two of them. The aim is to support the buildout of renewable electricity plants, with which the subsidized systems would be integrated into hybrid power plants.

Where does Bulgaria get its electricity from?

It came from thermal power stations, and only 7 percent from solar and wind. Historically, Bulgaria has also been a major producer and exporter of electricity for the surrounding region with a total of 10 interconnectors spread across Romania, Serbia, North Macedonia, Greece, and Turkey. The country thus has a critical role in driving a more s

How much money does Bulgaria earmark for battery systems?

Bulgaria earmarked EUR 273 million in subsidies for battery systems required to be installed together with renewable electricity plants.

Bulgaria gives special focus to energy storage. Earlier this month, Renalfa IPP has started the commercial operation of its first utility-scale battery energy storage system. ...

Billed as the largest operating battery energy storage system in Bulgaria to date, the 25 MW/55 MWh facility, developed by Austria's Renalfa IPP, came online at the start of the month.

Bulgaria's Ministry of Energy announced two tenders to add 1,425 megawatts (MW) of renewable energy to

## Bulgarian energy storage battery

the grid and 350 MW of battery energy storage system (BESS) projects. The main goal of the investment is to increase the share of clean energy in Bulgaria's energy mix on its way to climate neutrality.

The Bulgarian Ministry of Energy funding is part of the country's Recovery and Resilience Facility (RRF), a series of projects implemented across the EU in the wake of the Covid-19 pandemic to help improve the financial and environmental sustainability of Europe's economies. ... US battery energy storage system (BESS) project developer ...

The 25 MW / 55 MWh utility-scale battery energy storage system (BESS) located in Razlog Municipality, Southwestern Bulgaria commenced commercial operations. This significant milestone marks the ...

The Bulgarian energy ministry this week launched a public consultation on the conditions for an electricity storage tender procedure under the National Rec. ... Renalfa IPP recently commenced commercial operation of a 25-MW/55-MWh battery energy storage system (BESS) in Bulgaria, marking the country's largest operating BESS to date.

The Bulgarian Ministry of Energy is readying to launch a tender on September 2 and provide Capex support for the construction and commissioning of 3 GWh of standalone energy storage facilities.

With energy independence high on its agenda, it's no wonder Bulgaria welcomes mega battery storage at this time. Bulgaria Frames Applications for Mega Battery Storage. The Bulgarian Minister of Energy opened the bidding to supply bulk energy storage on 21 August, 2024.

Bulgaria's Ministry of Energy has launched two tenders to add 1,425MW of renewable power generation to the grid and 350MW of battery energy storage system (BESS) projects. The ministry said the main objective of the investment, totalling BGN535.1 million (US\$298.2 million), is to increase the share of clean energy in Bulgaria by supporting ...

National Electricity Co. - NEK is preparing to invest in two floating solar power and two pumped storage hydropower plants and developing battery energy storage proposals. Most of the Bulgarian state-owned power utility's projects are in the initial phases.

Bulgaria plans to support a total of 1.4 GW new wind and solar projects alongside 350 MW co-located battery energy storage systems (BESS) via a grant of almost EUR 340 million from EU's National Recovery and Resilience Plan (NRRP). The energy ministry has put out for public consultation the draft documents for application and implementation of the ...

The Ministry of Energy in Bulgaria has launched 2 separate calls to build new renewable energy capacity and energy storage facilities in the country with more than BGN 535 million (roughly USD 298 million) budget. The BG-RRP-4.032 tender will support new solar and/or wind power projects with co-located energy storage facilities.

Company Signs Agreement in Bulgaria to Promote Energy Security. Cranberry Township, PA, May 5, 2022 - Westinghouse Electric Company and Bulgarian Energy Holding (BEH), the state-owned energy enterprise, have signed today a Memorandum of Understanding to implement Long-Duration Energy Storage (LDES) in Bulgaria. The signing was witnessed by ...

Investors have until June 12 to apply for grants for energy storage investments in Bulgaria of EUR 273 million within two calls. The subsidies are for battery systems required ...

Bulgaria relying heavily on energy storage in green transition. Bulgaria already held the first two tenders for battery energy storage systems (BESS) that would be integrated with renewable electricity plants. Renalfa IPP commissioned its first utility-scale battery energy storage system in June. The 25 MW - 55 MWh facility in the town of ...

Lithium-ion battery manufacturer Hithium will provide 55MWh of battery products for a solar-plus-storage project being built by EPC firm SolarPro in Bulgaria. China-based Hithium will provide the battery energy storage system (BESS) technology to SolarPro for the project in the southwest town of Razlog, Bulgaria, which also features 33MWp of ...

Vienna-based developer Renalfa IPP has started commercial operation at its 25 MW/55 MWh battery energy storage system (BESS) located in the city of Razlog, southwestern Bulgaria.. The system, which is connected to the transmission network and located alongside a 33 MW solar plant, successfully went live at the start of the month. Renalfa IPP claims the facility ...

Bulgaria's battery storage market gears up Bulgaria has installed between 40 MWh and 50 MWh battery energy storage capacity to date. However, a new national legislation as well as funds provided through the European Union's Recovery and Resilience Facility could see the country install another 1 GWh over the next two years.

Hithium has agreed to supply the battery products to a 55 MWh energy storage project, for which Solarpro is providing turnkey EPC services. The new plant will support a photovoltaic installation in the southwest Bulgarian town of Razlog.

"The construction of storage facilities is key to the efficient balancing and management of the power system," said energy minister Vladimir Malinov. "The successful implementation of this procedure will guarantee the security and stability of the power system. An opportunity to integrate the electricity produced from renewable sources on the market in the ...

The Bulgarian government considers the latest battery storage tender as part of its larger efforts to increase the share of renewable energy generation, especially wind and solar, in the country's energy mix and ensure seamless integration of ...

## Bulgarian energy storage battery

The proposed programme is aligned with Bulgaria's efforts to make renewables account for 27% of its gross final energy consumption by 2030. Under the scheme, the government aims to facilitate the deployment of 1,425 MW of renewable energy and 350 MW of battery storage capacity. (BGN 1.0 = USD 0.538/EUR 0.511)

Electricity storage is a key part of Bulgaria's NRRP, says Dimitar Zwiatkow, Partner in the energy department of international law firm CMS Sofia, part of the CMS Reich-Rohrwig Hainz Rechtsanwälte GmbH regional office. Also, a special fund is envisaged for a pilot scheme to support small and medium-sized enterprises to install renewable ...

According to an EY study, additional newly added battery capacities are expected to increase by between 20% and 24% each year. The RESTORE program and funding opportunities. Bulgaria is in the process of realizing a significant investment in energy storage facilities through the RESTORE program, which is part of the Recovery and Sustainability ...
