5 days ago&#0183; Each year, solar panels get more and more efficient --that is, they produce more power per square foot. As of 2024, the most popular solar panels can produce about 400 watts of electricity when they're in full sunlight. If you want to make the most of your roof's solar potential, get panels with at least that much power output.

With average project costs of around \$24,000 to \$29,000, SunPower's panels can be a bit more expensive than many competitors' products. But you certainly get significant value for your money.

For some, buying equipment directly from Amazon or wholesale resellers is the best place to buy solar panels and the most affordable option. For others, a large, national company may be able to provide you with a better deal than you can find on the EnergySage Marketplace. Using the EnergySage marketplace, buying solar panels is easy.
