This table shows the submitted natural gas storage projection, forecast closing price, and time bonus for the current contest week. Projections are hidden until submissions for that week close on Tuesday at 5:00 pm EDT, after which they will be visible to all until the next contest week begins on Thursday.

Storage Projection Interpretation Based on the 5-year historical range, maximum, and minimum, the projected storage injection or withdrawal is assigned a score from -10 to +10, to assess the bearishness or bullishness of the report, respectively. ... Celsius Energy does not make an express or implied warranty of any kind regarding the data ...

These tables breakdown the entrant's performance in the contest by the components of the weekly score--storage projection, closing price, and bonus multiple--and then compares this performance to the rest of the field to highlight the strengths and weaknesses of each participant. These statistics update at the end of each contest week.

Welcome to Celsius Energy's Natural Gas Storage Contest! This is a 10-week contest designed to measure its participants' skill in projecting natural gas weekly injections or withdrawals and natural gas price movements. There contest is free to enter and does not require any personal information. The contest objectives are simple.

While this is typically the peak of heating demand when natural gas sees the largest storage withdrawals, inventories are invariably sufficient to meet demand and this becomes clear early on, generally within the first month of the season, though some exceptions, such as the Winter of 2013-14, do exist. ... Celsius Energy. Disclaimer: Natural ...

## Celsius energy storage

Storage projections for a given week are issued 28 days in advance of the date that the EIA releases its official tally, and updated every 12 hours. Early projections tend to have a greater ...

Daily Commentaries For The Last 30 Days: Monday, November 4, 2024 Natural Gas Punished With -13% Weekly Decline & Set To Face Continued Headwinds From Mild Temperature Outlook & Weak LNG Export Demand; Overvaluations Versus Fair Price Erased, But Cold Air Still Needed To Trigger Rally; Stable Pattern Featuring Cool Rockies But Mild East Set To Prolong Injection ...

Fuel Generation Mix & Alternative Energy Demand Fuel generation mix is the fraction of each fuel type--natural gas, coal, nuclear, wind, solar, and hydroelectric--that goes towards supporting the electricity grid. Natural gas powerburn demand is a function of both the percent share of this generation mix and cooling degree days.

8-Month Projected Natural Gas Storage Surplus Or Deficit. Disclaimer: Natural Gas & Oil Storage Projections, Intraday Natural Gas Stats, Renewable Energy Stats, Morning Reports, and fundamental pricing models are released by Celsius Energy as experimental products.
