This is rare and usually only happens when the power to the laptop is cut off, which is why its asking you to plug it in. If it is stuck at that screen and it won't continue even if you press any key, then you may need to flash the bios yourself to the latest version to make it go away, just be sure to do some research on how to do it if you ...

Jika semua langkah di atas sudah Anda coba namun pesan kesalahan "Check System Power Error, Please Plug in AC Adapter Asus" masih muncul, mungkin ada masalah lain yang memerlukan bantuan teknisi profesional. Jangan ragu untuk menghubungi pusat layanan pelanggan Asus atau membawa laptop Anda ke pusat layanan terdekat.

Press and hold the power button for 1 full minute. (I added this step because we were talking through the next steps) Wait 15 seconds after releasing. Ensure the powercord is plugged into an outlet and not a surge protector, THEN plug it into the computer. Press and hold the power button for 10 seconds. This should boot up the system.

Hey i had this same exact problem and i tried turning it on after a few days and it worked but it came back again when i tried to do a windows update as ethernet was not working after all the others troubleshooting.
