RESIDENTIAL CHECKLIST Honolulu County Supplement RESIDENTIAL - HONOLULU COUNTY SUPPLEMENT pg. 1 of 5 June 2020 OVERVIEW Honolulu County adopted the 2015 IECC with amendments in June 2020, and the Honolulu amendments incorporate those adopted by the State of Hawaii on March 21, 2017 with some changes.

The average cost of a photovoltaic (PV) system is between \$15,000 and \$40,000. The average payback period for a PV system is between 7 and 20 years. The payback period is the amount of time it takes for the savings from using solar energy to offset the initial cost of installing the system. In Hawaii, the average payback period is about 10 years.

RESIDENTIAL - with Honolulu amendments pg. 2 of 16 November 2023 Sponsor: Hawaii State Energy Office Acknowledgment: This material is based upon work supported by the Department of Energy under Award Number EE0006986. Disclaimer: This report was prepared as an account of work sponsored by an agency of the United States Government.

CURRENT STATE ENERGY CODE - 2021 IECC. Due to the suspension of the authority and duties of the State Building Code Council (SBCC) per the Governor's Proclamations Relating to Affordable Housing, no code amendments have been adopted by the SBCC during the term of these proclamations. However, the 2021 International Energy Conservation Code (IECC) ...

the mounted aluminum framed PV panels (i.e., other PV technologies or ground mount systems), EPA recommends that an installer certified by the North American Board of Certified Energy Practitioners (NABCEP) determine the ideal system for the project's unique building environment.

2. Install or entirely replace energy saving devices such as a solar water heater and photovoltaic (PV) system or relocate panels from the roof to the ground or vice versa.
3. Water tanks or catchment systems for potable household use regardless of height or size;
4. Retaining wall (concrete, CMU, rock, or other) 4-feet or higher.
- 5.
