

The country's energy policy calls for 70% of its energy to be derived from renewable energy sources by 2030. Minister for Mining and Energy Juan Carlos Jobet noted that the country's National Energy Policy modelled the need for at least 2,000MW of energy storage to help integrate that renewable energy onto Chile's grid.

The energy and mining committee in the upper house of Chile legislature voted unanimously in favor of the energy storage and electro mobility bill early this month. The public ...

Under this, the country has taken various regulatory steps with a focus on making renewable energy sources (RES) the key generation source, streamlining transmission network expansion, and promoting energy storage systems. Chile's Agenda Inicial para un Segundo Tiempo de la Transición Energética or Initial Agenda for a Second Stage of the ...

2 · Innovative energy storage technology to enhance grid stability and accelerate Chile's renewable energy transition. HEATHROW, Fla. (November 12, 2024) - Prevalon Energy, a leading provider of advanced energy storage solutions, is pleased to announce the signing of two new contracts with Innergex Renewable Energy Inc. (Innergex) to deploy state-of-the-art ...

The technological diversity of energy storage projects in Chile is remarkable. From battery storage systems to innovative projects with gases such as CO₂, the country is exploring different solutions to meet changing energy demands.

The number of ongoing and planned energy storage projects in Chile reached 85 by August 2023, with their capacity totaling 6.4 gigawatts (GW), PV Magazine reports. Sixty projects with a total capacity of 4.7 GW are already under construction, including 50 projects totaling 3.9 GW, which will be put into operation in the period from 2024 to 2026.

According to its Strategic Plan 2023-2026, the IPP will commit US\$2.6 billion to these expansions, with US\$1.5 billion allocated to solar PV and US\$800 million to energy storage. Of its three major operational markets - the US, Europe and Latin America - Greenergy highlighted Chile as a fulcrum for leveraging up its solar and storage businesses.

The planned energy storage projects will be located in various sites in northern Chile, where most solar and renewable energy power plants are situated, requiring a total investment of \$2 billion.

Supreme Decree No. 70 of 2023 (DS 70) has been recently approved, modifying Supreme Decree No. 62 (DS 62), which regulates the capacity payment, also called sufficiency power, in Chile. This modification introduces significant changes in the recognition and compensation of energy storage systems and hybrid

plants with storage capacity. Recognition ...

As frequent readers of Energy-storage.news might know, the majority of BESS projects built and in construction in Chile are paired with a solar PV project. Although a standalone project, the Arena BESS facility is still located in the northern region of Chile, where most of the solar PV capacity is located, due to its high irradiation levels.. Its proximity to solar resources ...

Legal Alert: Bill to Promote Energy Storage in Chile. December 15, 2021 / By Felipe Bahamondez, Diego Peña and Roberta Andreani. In the context of the transformation of the energy matrix and the promotion of the rational and efficient use of energy resources, the Government recently submitted to Congress a bill on the promotion of energy storage.

The Salvador Battery Energy Storage Project in the Atacama desert of Northern Chile, one of several co-located in development. Image: (Rendering Credit: Mitsubishi Power) (CNW Group/Innergex Renewable Energy Inc.) Chile looks set to pass major legislation incentivising the deployment of energy storage after a draft bill passed the Senate yesterday.

In 2023, Chile also enacted a new Law 21505 to promote energy storage and electromobility. It highlights the following measures: participation of pure storage systems in ...

However, countries such Canada, Mexico, and Chile are actively promoting policies to stimulate energy storage development, positioning Chile to become the second-largest energy storage market in ...

Energy storage allows management of the variability of solar and wind power, and will also help the country to retire its coal-fired power plants as scheduled. ... This raises the urgent need to implement public policies aimed at the efficient use of energy in the transport sector to reduce the environmental impact and Chile's dependence on ...

Nearly 2 GWh of renewable energy was curtailed in Chile in March of 2024, with a heavy concentration in the Northern regions of Atacama and Antofagasta. 2 Both regions, according to AMI estimates as of April 2024, have a BESS pipeline of 4.8 GW, 1.6 GW of which are assets already under construction or have an approved environmental license.

The Chilean authorities want to contract 5,400 GWh of power from renewable energy, while also including battery storage. The selected developers will secure 20-year power purchase agreements (PPAs).

Chile aims to reach carbon neutrality by 2050. Power generation companies have formally committed to retiring thermal power plants by 2040. Also, among the top government programs outlined to support this goal is the promotion of energy storage. Chile has several long- and short-term Green Hydrogen goals.

Two major policies drive Chile's mitigation and adaptation actions in the energy sector. Chile's Framework

Chile's energy storage policy

Law on Climate Change, passed in 2022, enshrines the country's 2050 net zero emissions target into law and emphasises the importance of building resilience to the impacts of climate change. It starts by supporting broad net zero and ...

The Atacama desert region in Chile is a hotbed of solar and storage activity. Image: Elias Roviello. Nine projects pairing solar or wind with energy storage submitted environmental impact assessments (EIAs) in Chile last month, totalling well over 2GWh of capacity, by companies including Engie, EDF and Sonnedix.

The project, which was revealed by Greenergy in November 2023, will pair 1GW of solar PV with 4.1GWh of energy storage, which the company said makes it the largest energy storage projects in the world. "The agreement with a leading company like BYD demonstrates our firm commitment to energy storage and represents a major step forward in securing the supply ...

Chile's energy storage incentives have already borne fruit. At present, there are 85 energy storage projects in various stages of development nationwide, with a total capacity of 6.4 GW ...

Last week, three different developers announced separate large-scale battery energy storage (BESS) projects collocated with solar farms in Chile.. Enel Chile, the local subsidiary of Italian energy company Enel, said it will deploy a 67 MW/134 MWh battery at the El Manzano solar power plant. The solar project with a capacity of 99 MW is located in the town of ...

In 2015, the Ministry of Energy of Chile published National Energy Policy 2050, which includes a broad set of energy efficiency goals for 2035 and 2050. The policy covers the main sectors of the national economy. ... Carbon Capture, Utilisation and Storage; Decarbonisation Enablers; Explore all. Topics . Understand the biggest energy challenges.

On December 30, 2015, the President Bachelet received the document "Energy 2050: Chile's Energy Policy" from the Minister of Energy, Mximo Pacheco. The main objective of the Policy 2050 was to achieve and maintain the reliability of the entire energy system, while meeting sustainability and inclusion criteria and contributing to the ...

Energy Law (Law 20257) and reaffirmed, as a minimum, in 2012 by the National Strategy for the Energy Sector. The 2014-2018 Energy Programme aims at achieving a 45% renewable energy share for new electric capacity installed between 2014 and 2025. A quota obligation is hiles main support scheme for renewable electricity. The 2008
