

Chloride is a global company that specializes in the design, production, and maintenance of industrial uninterruptible power supply (UPS) systems to ensure a reliable power supply for critical equipment across multiple industries.

Chloride's CP70Z is an industry-leading uninterruptible power supply (UPS) system range that offers maximized power availability for critical process applications. It makes it a system of choice to guarantee the safety of personnel and assets in the

Chloride's FP60Z is available in standard range from 5 to 160 kVA in single-phase or three-phase output configurations and can be adapted to reach up to 250 kVA output power. It offers a wide choice of DC battery voltages (110 V, 220 V or 400 V) and of output voltages (from 1 ...

Chloride's CP70Z is an industry-leading uninterruptible power supply (UPS) system range that offers maximized power availability for critical process applications. It makes it a system of choice to guarantee the safety of personnel and assets in the most

Chloride's solutions guarantee a permanent power supply to the most sensitive equipment throughout the value chain such as Hydrogen leak detection systems, electrolyzer control and command systems, remote monitoring systems, transformer substations for offshore wind turbines, SCADA systems, control of hydrogen transport in pipelines.

Chloride is a global leader in the design, manufacture and servicing of industrial UPS systems that secure power supply for the critical industries that power the world. From energy producers to transport providers, our technologies ensure what can't fail won't fail

Chloride is one of the world's leading companies in designing and manufacturing Uninterruptible Power Supply (UPS) systems for critical loads in the energy, transport, industry, and infrastructure markets. The origin of Chloride stretches back to the 1890s, with its roots in the design and production of batteries.
