Are commercial solar panels the same as residential solar?

Commercial solar works in the same way that residential solar works, except sizing, equipment, and watts needed will differ. A shipping warehouse and a small boutique are technically both commercial businesses, but a warehouse will require more panels to sustain its energy needs. How long does it take to install commercial solar panels?

Which companies should go solar?

Companies such as Walmart, Apple, and Amazon are leading the way, with growth across many corporate sectors. Reduced operating costs by saving on electricity bills. What Types of Companies Should Go Solar?

Do solar installers rely on subcontractors?

In some instances, solar installers will rely on subcontractors to perform some, or all, of the work included during your solar installation. Don't let this put you off: it's entirely standard procedure in the industry.
