

Does Continental Tires have a green energy plan?

Continental is continuously working on energy savings and on switching to energy obtained from zero-emission sources. Last year, Continental Tires achieved a total newly installed photovoltaic capacity of 26.2 megawatts peak. This will enable Continental to generate up to 27.9 gigawatt hours of additional green electricity per year.

How much energy does Continental Tire use a year?

In 2023 alone, Continental's tire division reduced its annual energy requirements by a total of around 150 gigawatt hours thanks to 160 energy-saving projects. This was achieved by such measures as for example thermal insulation. This is roughly equivalent to the average annual electricity supply of 12,500 single-family homes.

Does Continental Tires have a photovoltaic system?

Expanded photovoltaic system at Continental's tire plant in Rayong (Thailand). Continental is continuously working on energy savings and on switching to energy obtained from zero-emission sources. Last year, Continental Tires achieved a total newly installed photovoltaic capacity of 26.2 megawatts peak.

What makes Continental a sustainable tire?

Its integrated sustainability profile sets new standards. Continental's development engineers and material experts have worked on three levels to achieve this: at more than 50 percent, the tire contains a particularly high proportion of traceable, renewable and recycled materials.

Does Continental Tires have climate protection?

Last year, the company achieved the grade "A-" in the area of climate protection. New photovoltaic system at Continental's tire plant in Alor Setar (Malaysia). Thanks to its many years of commitment, Continental Tires already consumes 22 percent less energy per metric ton of tires produced than the industry average.

Where is Continental Tire based?

Pedro Carreira, Head of the Continental tire plant in Lousado, Portugal. A conventional gas boiler will continue to be available in addition to the new electric steam boiler. This allows Continental to react flexibly to the fluctuating availability of renewable energies and other environmental factors.

Read also: Natron Energy to Build \$1.4B Sodium-Ion Battery Manufacturing Facility in North Carolina. Company Overview. Continental Tire, headquartered in Fort Mill, South Carolina, stands as a leading global tire manufacturer with over 190,000 employees across 61 countries and 554 locations. According to their website, company has been in the ...

CO 2-neutral production process being tested in mega-plant in Lousado, Portugal with a production capacity

## Continental tire energy storage

of more than 18 million tires per year; An innovative electric boiler can generate steam from green electricity instead of gas; By 2040 at the latest, Continental wants to switch production in all tire plants to CO<sub>2</sub>-neutral; Dr. Bernhard Trilken, Head of ...

Hanover/Munich, September 6, 2021. Continental is unveiling its innovative Conti GreenConcept tire concept at this year's IAA MOBILITY. This conceptual study by the premium tire manufacturer leverages both current and emerging technological approaches to the engineering of sustainable tires for passenger cars, as yet another example of Continental's wide-ranging activities in ...

I purchased 4 Continental tires in March, 2021. I have put about 40K miles on them (they came with a 80K mile warranty, which I purchased for \$84). ... Specializing in energy storage system battery testing, Sterling Performance provides state-of-the-art EV battery testing and other battery pack testing services to meet the latest industry ...

Thanks to 160 energy-saving projects, Continental Tires reduced its annual energy requirements by around 150 gigawatt hours in 2023. This was achieved, for example, through the increased use of renewable energies and thermal insulation. 150 gigawatt hours equates to powering about 12,500 family homes for a year, with an average consumption of ...

Continental Tire will introduce its first EV compatible bus and truck tire to the US market in Q4 of 2024 EV compatible tires align with Continental's strategy program to sustainability

Lower rolling resistance means the vehicle consumes less energy, which in the case of electric vehicles extends their range by up to 6 percent. At more than 50 percent, the tire contains a particularly high proportion of traceable, renewable and recycled materials. ... Driving into the future on green Continental tires "The cars of the future ...

DO store all motorcycle tyres at temperatures not exceeding 35°C, preferably below 25°C.; AVOID storing conventional motorcycle tyres (Sport/ Touring/ Off-Road etc.) at temperatures well below the freezing point (max. -20°C); AVOID storing race motorcycle tyres (Track/ RaceAttack) below 0°C.; ALWAYS allow tyres - which have been exposed to 0°C or less - to warm to room ...

Energy Storage; Geothermal Energy; Smart Grid; Energy Efficiency; ... From sourcing sustainable materials to recycling end-of-life tires, Continental is dedicated to achieving 100 percent carbon ...

The Conti CityPlus is based on Continental's EcoContact 6 series tire. It has been specially engineered to offer high mileage and low rolling resistance. To achieve higher overall energy efficiency, the concept tire includes a range of modifications designed to reduce tire deformation during braking and acceleration.

According to research by Continental, tires are responsible for up to 20 percent of a vehicle's total resistance. For electric cars, where efficient driving is a priority, low rolling resistance is particularly important, as it

## Continental tire energy storage

contributes significantly to reducing energy consumption and achieving the greatest possible range.

Once we have the materials, we need energy to transform them into tires. That is why we want to establish highly resource and energy-efficient operations that produce the lowest emissions possible. We have continuously been increasing our efficiency in water and energy consumption for more than a decade.

Continental Tires said it installed new photovoltaic capacity of 26.2 megawatts peak across its site last year. This, it said, will enable Continental to generate up to 27.9 gigawatt hours of additional green electricity per year.

Try yard bags or leaf bags. Ensure the bag (and tire) is free of moisture, then remove as much air as possible from the bag (use your vacuum cleaner!) and tape it shut. This airtight environment will reduce evaporation of oils from the rubber compounds. Specific tire storage caddies or tire totes are also available.

When developing energy-efficient tires, tire engineers and material experts have up until now focused on optimizing a tire's rolling resistance during free rolling at a constant speed. This approach has enabled Continental to minimize the rolling resistance of the passenger car tires in its portfolio in total by an average of 25% over the ...

Continental and Renewable Energy Hamburg Clusteragentur GmbH (EEHH) organized a forum about "Hydrogen & Transportation" on July 5 th in the Innovation Hub located at the Innovation Hub on Continental's factory premises in Hamburg-Harburg. EEHH has already established a strong network of more than 100 "hydrogen players", i.e., mainly small, medium ...

Continental Tire says construction on the planned Fort Worth distribution center is expected to start this month. ... will have storage capacity for up to 800,000 tires and the potential to expand ...

The plant produces large truck and bus tires for the U.S. commercial vehicle market. Find out more. Fairlawn, OH Our ContiTech headquarters for North America is the operational hub for business in the region. ... Mt. Vernon is home to one of Continental's largest tire plants. Find out more. Sumter, SC The plant produces premium lines of ...

Our Continental tire innovations meet the main challenges posed by electric vehicles in three ways: Tires for electric vehicles carry a heavier load and have to withstand high instant torque, leading to higher tire wear, so we need tires with stronger constructions and more robust rubber compounds. ... more energy-efficient and low-impact ride ...

Hanover, Germany - Continental has officially opened a fully automated high-bay warehouse at the tire production plant in Otrokovice, Czech Republic. It has a storage capacity of more than 930,000 tires. With the facility, the premium tire manufacturer is centralizing its warehouses in the area of Otrokovice.

Continental Tyre Malaysia reinforces sustainability ambitions with Energy & Environment Day ... Porsche Approves Three Continental Tire Lines for Original Equipment on the Panamera; ... are key to determining service life. So too, is regular rotation and proper storage of your tyres. But since service conditions vary widely from car to car and ...

Continental is known for safe, energy-efficient and long-lasting tires. Our research and development department is continually changing, updating and improving our products. Our goal is to continuously improve their mileage, wear rate and rolling resistance. Our rolling resistance optimized Tires are already contributing to this goal today.

The company also has a generated sales of about EUR40M, making it one of the world's successful tire manufacturers. This company trails other tire brands like Bridgestone, Firestone, Cooper Tires, thus, making different types of tires - replacement tires and original equipment (OE) tires for cars, suvs, minivans, etc.. The brand is known to supply Mercedes ...

Low rolling resistance also has positive effects for combustion vehicles. It reduces CO2 emissions and consumption, which cuts fuel costs. At the same time, fleet operators can save on expenses for tire replacement and storage by using all-season tires. Accordingly, Continental's first three sizes also cover popular fleet vehicles.

DO store tires, if outdoors, protected by an opaque waterproof covering, but avoid creating a heat box or steam bath. Ensure proper ventilation. DO store tires, if outdoors, where tires are raised off the storage surface. AVOID storing tires where the area is wet, oily, and/or greasy such as with gasoline or petroleum-based products.
