The Marvellers has some standout worldbuilding, including cities in the sky and travel by airship, but one of my favourite things about Dhonielle Clayton's first middle-grade fantasy story is the magic system she creates -- or rather, magic systems, plural. There's Marveller magic, which is based around the five senses; some Marvellers perform their ...

Along the coasts and in many countries, seawater is widely used for cooling systems at power plants, as well as for some mining and industrial processes. The challenge, however, is that strainers must sufficiently filter out both small particles (sand, silt, suspended solids) and larger detritus (seaweed, aquatic life, marine debris) to reduce ...
