

CR2032 or BR2032 lithium 3V coin battery

What is the difference between CR2032 and 2032 batteries?

The main differences lie in their chemical composition and the specific applications they are best suited for. While CR2032 is a lithium manganese dioxide battery, 2032 batteries can have different chemistries like lithium poly-carbon monofluoride (BR2032) or be specific brand variations (DL2032).

Are BR2032 batteries compatible with CR2032?

For example, BR2032 batteries are a suitable replacement option for CR2032 batteries due to their identical size and nominal voltage. However, it is crucial to check the device's compatibility and refer to the manufacturer's recommendations before substituting one battery type for another.

What is the difference between CR2032 and DL2032 batteries?

While CR2032 is a lithium manganese dioxide battery, 2032 batteries can have different chemistries like lithium poly-carbon monofluoride (BR2032) or be specific brand variations (DL2032). These differences affect their performance, especially in varying temperature conditions.

Can you replace a CR2032 battery with a LIR2032?

This does mean that every lithium battery is created equal. For example, you can safely replace most CR2032 coin cell batteries with a BR2032 type lithium battery. You can not, however, always substitute an LIR2032 rechargeable battery for either a CR2032 or BR2032 type, without running safety risks, including overheating and fire.

What is the difference between BR2032 and LIR2032 batteries?

BR2032 batteries' wider temperature range is not so important for vacuum cleaners (that have inner home temperatures of below 20°C) and LIR2032s have an unacceptable self-discharge rate when compared with CR2032s to be used in vacuum cleaners, laptops, calculators, and similar devices.

What battery chemistry does CR2032 use?

Lithium batteries are the most common battery chemistry for CR2032. Coin cell batteries are the "larger" varieties of the button cell battery family. They are still small, usually no bigger than 25mm
