Build a farmhouse style DIY coffee table with storage underneath! This table is gorgeous, very sturdy, and works perfectly with rustic or industrial decor. This post completely ...

After all, no one wants to knock into the coffee table and get splinters in their knees. Now that the table top is prepped it's time to focus on the legs. Kerry grabs a Nypon plant pot and a Rodeby bamboo armrest, which are pretty cheap on their own. I can't imagine too many people look at these two things and think "ah, yes, table leg" but hey ...

For the base and table top themselves, she picked up a circular cut of wood and a black woven basket that was a perfect height for a small table. You can probably already see how this is going to go! Her first step was adding wood stain to the wood cut, making sure to apply nice long even strokes so the stain would come out even. After only one ...

Diy coffee table that can store electricity

Attach 1×2 upright supports to the plywood center divider using 1 1/4" pocket screws. Measure and mark the center of the coffee table and install the center support by driving 1 1/4" wood screws into the 1×2 uprights from the underside of the coffee table, then also attaching the top of the support to the shelf with 1 1/4" pocket screws.
