

# Do solar panels make your roof last longer

How long do solar panels last on a roof?

Solar panels can last between 20 and 25 years, so if your current roof will not last that long, consider getting a new one before installing solar so the timing of replacing both systems matches up. Before you commit to having solar panels installed on your roof, there are several factors to take into consideration.

Should I replace my roof and get solar panels at the same time?

Replacing your roof and getting solar panels at the same time can even provide some benefits. When you install solar panels and a new roof at the same time, it's very unlikely you'll need to re-roof during your system's lifetime. Solar panels are more durable than most roofing materials and can extend the life of the roof shingles they cover.

Can solar panels damage a roof?

Fortunately, roof damage from a solar panel installation is extremely rare because installers take precautionary steps while installing panels to prevent leaks and other damage. Like any home improvement project, using the right service provider is essential to a rooftop solar job.

How much does it cost to replace a roof before solar?

If you have an asphalt roof over 5-10 years old, you'll probably want to replace it before going solar. Replacing your roof and installing solar costs about \$30,000. If you need to replace your roof after you install solar panels, expect solar panel removal and reinstallation to cost anywhere from \$1,500 to \$6,000.

Why do you need a new roof for a solar system?

Increases process transparency: Combining the project involves coordination between roofing and solar experts for a seamless transition and installation. Ensures longevity and compatibility: A new roof provides a durable base for solar panels, enhancing system longevity and performance.

Should you add solar to your roof?

If you're thinking about replacing your roof--like millions of other homeowners every year in America--you may also be considering adding solar at the same time. In fact, an average of 2.3 million single-family, detached homes per year will require a roof replacement over the next decade.
