

Does installing solar panels void roof warranty

Can solar panels void my roof warranty?

If you're installing solar panels on a roof with a warranty, you might be wondering if your roof warranty can be voided by installing panels. The fact is, the portion of your roof that has panels on it will no longer be covered by your warranty. However, the installer of your solar panels will provide that portion of the roof with coverage.

Do solar panels have a warranty?

In addition to the manufacturers' roof warranty, homeowners who install solar panels should also consider the roof installation warranty provided by the solar panel installer. This warranty specifically covers the installation process and any potential damage caused by the installation of the solar panels.

Can a roof warranty be voided by installing panels?

As we mentioned previously, a roof warranty can be voided by installing panels, but only the section of roof covered in panels will lose coverage, and your panel installers will cover the section they install panels on. To be cautious, however, it doesn't hurt to let your original roof manufacturer know that you're installing panels.

Are solar panel warranties transferable in a home sale?

In most cases, solar panel warranties are transferable to the new owner in a home sale. However, some warranties are restricted to the original owner, so it is crucial to clarify this point with the manufacturer and installer offering the warranty.

How long does a solar installation warranty last?

Installer performance guarantees can last between 5-10 years and the specifics vary by company. Finally, if you go solar through a marketplace like solar.com, you may also be covered by another layer of warranties. For example, solar.com offers a TriGuard Guarantee. This marketplace warranty includes:

What is a performance warranty on a solar panel?

A performance warranty guarantees a maximum level of degradation- typically between .25% and .75% - per year so that in 25 years the panel will still have 80-90% of the power output it did in its first year. Performance warranties are important for sizing solar systems to maintain 100% offset for 25 years.
