Is draconic evolution a good mod?

I'm quite new to the modded minecraft world. Draconic evolution is one of the mods that caught my attention right from the beginning. I got the setup to get good amounts of draconium ingots in my SF3 world, but my problem is the insane amounts of energy it requires for everything.

Is IIRC a good base for a Tier 7 draconic base?

Even then it was "just" 20k/rft iirc, which is great for a normal base, but sucks if you want to fill a tier 7 draconic energy storage. Solars only get to 2krf/t per cell and I didn't want to have a giant field of tier 6 solars. Lava gens are fine but require too much space for big rf generation, just like solars.

Draconic Evolution is a mod that introduces high powered and efficient weapons, tools, armour, machinery, storage units, rituals, research and more. All items and blocks of the mod are highly dependent on Draconium Ore (which generates within the Overworld and Nether, but most commonly in The End) as well as Redstone Flux for energy. Many items come in two or more ...

Only one Energy Core is needed to create this structure along with four Particle Generators. When broken, the block does not retain the energy stored inside, but it will retain the energy when other blocks of the structure are broken, so it ...

??Draconic Evolution??

(If you reach numbers bigger than the Integer Max in combination with a "too small" energy core, you can potentially reach negative energy storage: I have no idea how to replicate this, but I thought it looks funny. Normally it just doesn't work or uses the last possible Energy number that was lower than the Max value.

Draconic Evolution is a mod created by brandon3055 originally for the TolkienCraft modpack by GreatOrator. It adds new powerful tools, machines, and items.
