

## Duke energy solar rfp

What is a Duke Solar proposal?

The proposal is the result of an agreement between Duke and solar industry groups-- the North Carolina Sustainable Energy Association; the Southern Environmental Law Center, which represented Vote Solar and the Southern Alliance for Clean Energy; solar panel maker Sunrun Inc.; and the Solar Energy Industries Association.

Does Duke Energy have a competitive bidding structure for solar energy?

Duke Energy Renewables: 22.6-MW - Cabarrus/Stanly counties, N.C. One of the provisions of 2017's "Competitive Energy Solutions for North Carolina" law was a process that would create a competitive bidding structure for solar energy. Projects can be built anywhere on the Duke Energy system in North Carolina or South Carolina.

What does Duke Energy Carolinas do?

Duke Energy Carolinas is committed to building a robust, cost effective portfolio of renewable resources through purchases from renewable energy facilities, including wind, solar, landfill gas, waste-to-energy, and biomass. We appreciate your interest in helping us meet our renewable energy goals.

Does Duke Energy offer solar services?

Our site is customized by location. Please select the location of your service and we'll remember your selection for next time. Solar is a great renewable energy choice and is playing an important role in how Duke Energy provides electricity to customers. Find out how.

What does Duke Energy Florida's new energy rate proposal mean?

The company said the rate proposal aligns with Duke Energy Florida's commitment to delivering a more intelligent energy future, ensuring price stability and certainty for its customers. The proposed investments aim to reduce outages, shorten restoration times, and cut emissions at a reasonable cost, the release states.

What does Duke Energy's Solar Plan mean for customers?

Duke Energy's proposal aims to help customers maintain the value of their solar panels and deal with a quickly changing market. The company states that it intends to ensure "customers who don't have solar don't end up paying more to support solar customers". Several local solar companies agree with the plan.
